

The First Year of COSMO User Support

Cosmin BARBU, Rodica DUMITRACHE, Amalia IRIZA, Bogdan MACO
Alexander SMALLA

National Meteorological Administration of Romania
Deutscher Wetterdienst

Outline:

- Motivation
- Main issues
- Supported countries & status
- Conclusions

Priority Task – “Support of COSMO licenses”

Motivation:

- by the end of 2012, the GRIB2 standard will be implemented in the COSMO software
- DWD will not invest in the adaptation of the HRM code to this standard
- due to this fact, DWD will end the support for the HRM model and expects the migration of about 25 operational HRM users to the COSMO model
- **by the end of 2013/beginning of 2014 GME will be replaced by ICON!**

Please, note the email below to the HRM users!!

☆ **Takeuchi Sabrina** Sabrina.Takeuchi@dwd.de to Majewski, anahit_f [show details](#) Aug 18 (6 days ago) [Reply](#)

Hello All

New updates are available:

hrm_2.9.tar.gz - The newest version of the hrm program.
gme2hrmV2_8.tar.gz - The newest version of the gme2hrm program.
hmx2hmyV2_7.tar.gz - The newest version of the hmx2hmy program.

These are the latest and the last updates for the HRM package.
The support for HRM will be discontinued at end of 2012.
At the end of 2013 there will be no more GME data available for running HRM in production mode.
Please migrate your HRM to COSMO as soon as possible.

Additionally following updates are available:
DWD-libgrib1_110128.tar.gz - This is the newest GRIB1 code available. It is the only grib1-package which can be used for both HRM and COSMO.
support.tar.gz - The newest support library. This library may be used for both HRM and COSMO.
supplement.tar.gz - The newest supplement routines. These routines may be used for both HRM and COSMO.
math_dwd_1.3.tar.gz - The newest math library. This library may be used for both HRM and COSMO.
schedulerV3_1.tar.gz - The newest scheduler version. Some batch systems and COSMO will be supported.

Outdated and never be supported:
grib1 - The very old grib1 package, for 32bit systems only
newgrib1 - The old grib1 package, but modifications have to be done for large domains

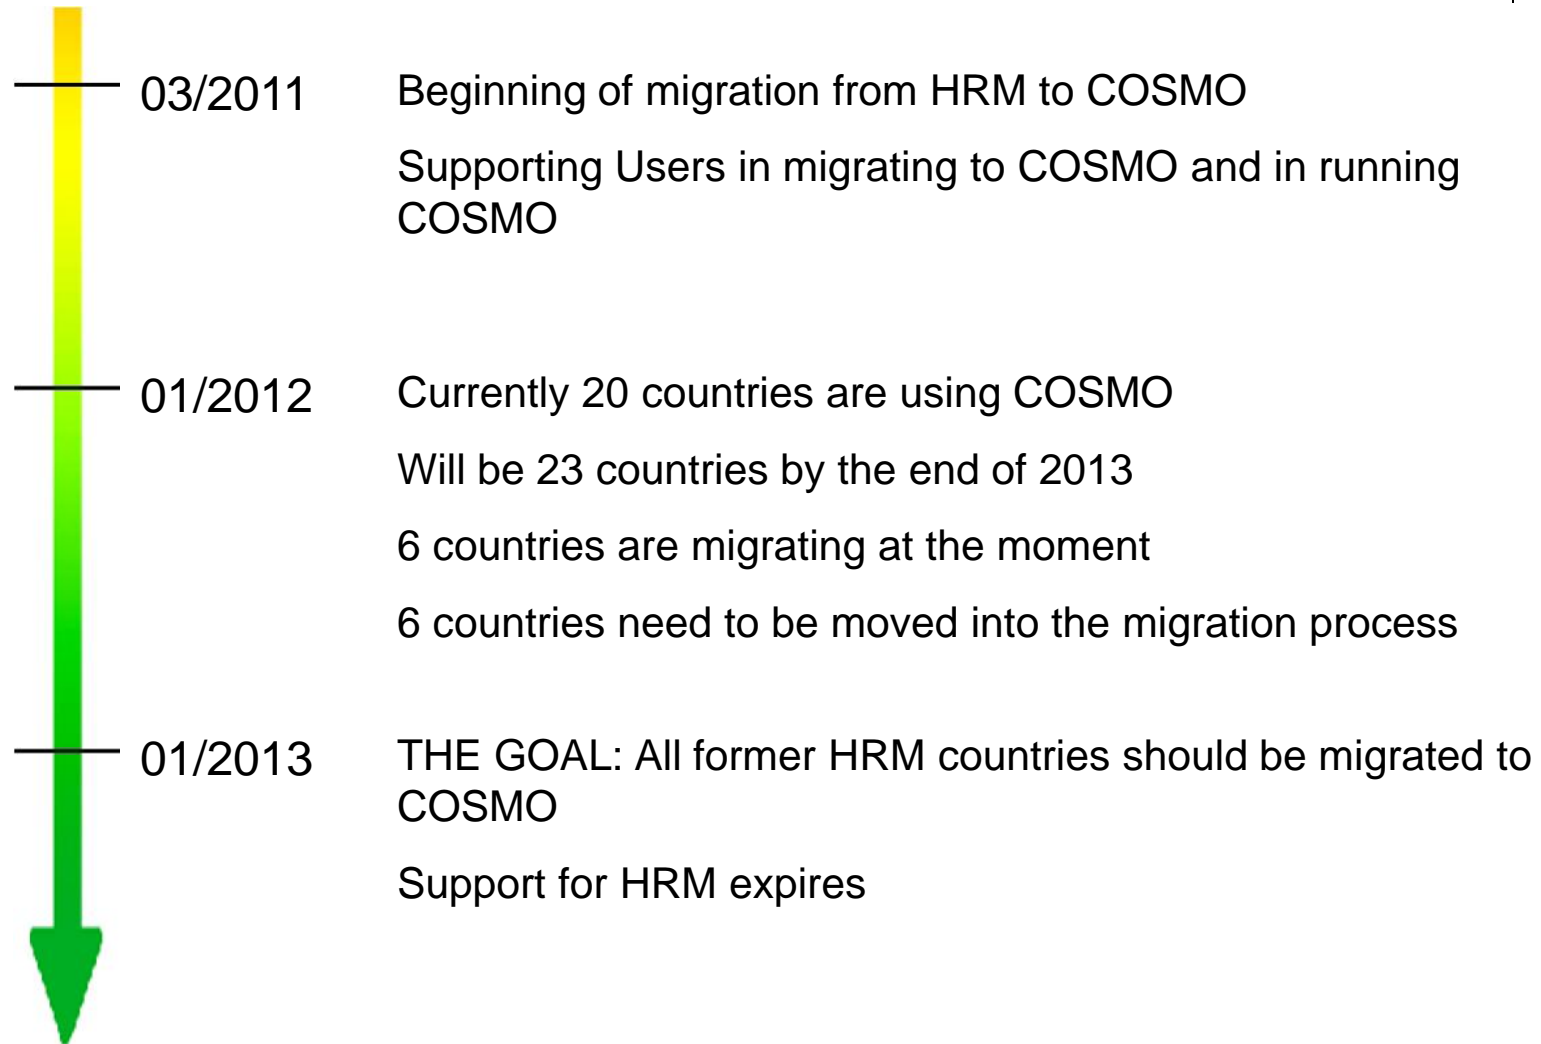

Caution:
The support for HRM will be discontinued end of 2012.
No more GME data will be available at the end of 2013.
Therefore migrate your HRM system as soon as possible!

COSMO is able to run with your GME data and the ICON data, which is available very soon.
For migrating to COSMO please contact Detlev Majewski (email:Detlev.Majewski@dwd.de)

Sincerely
Michael

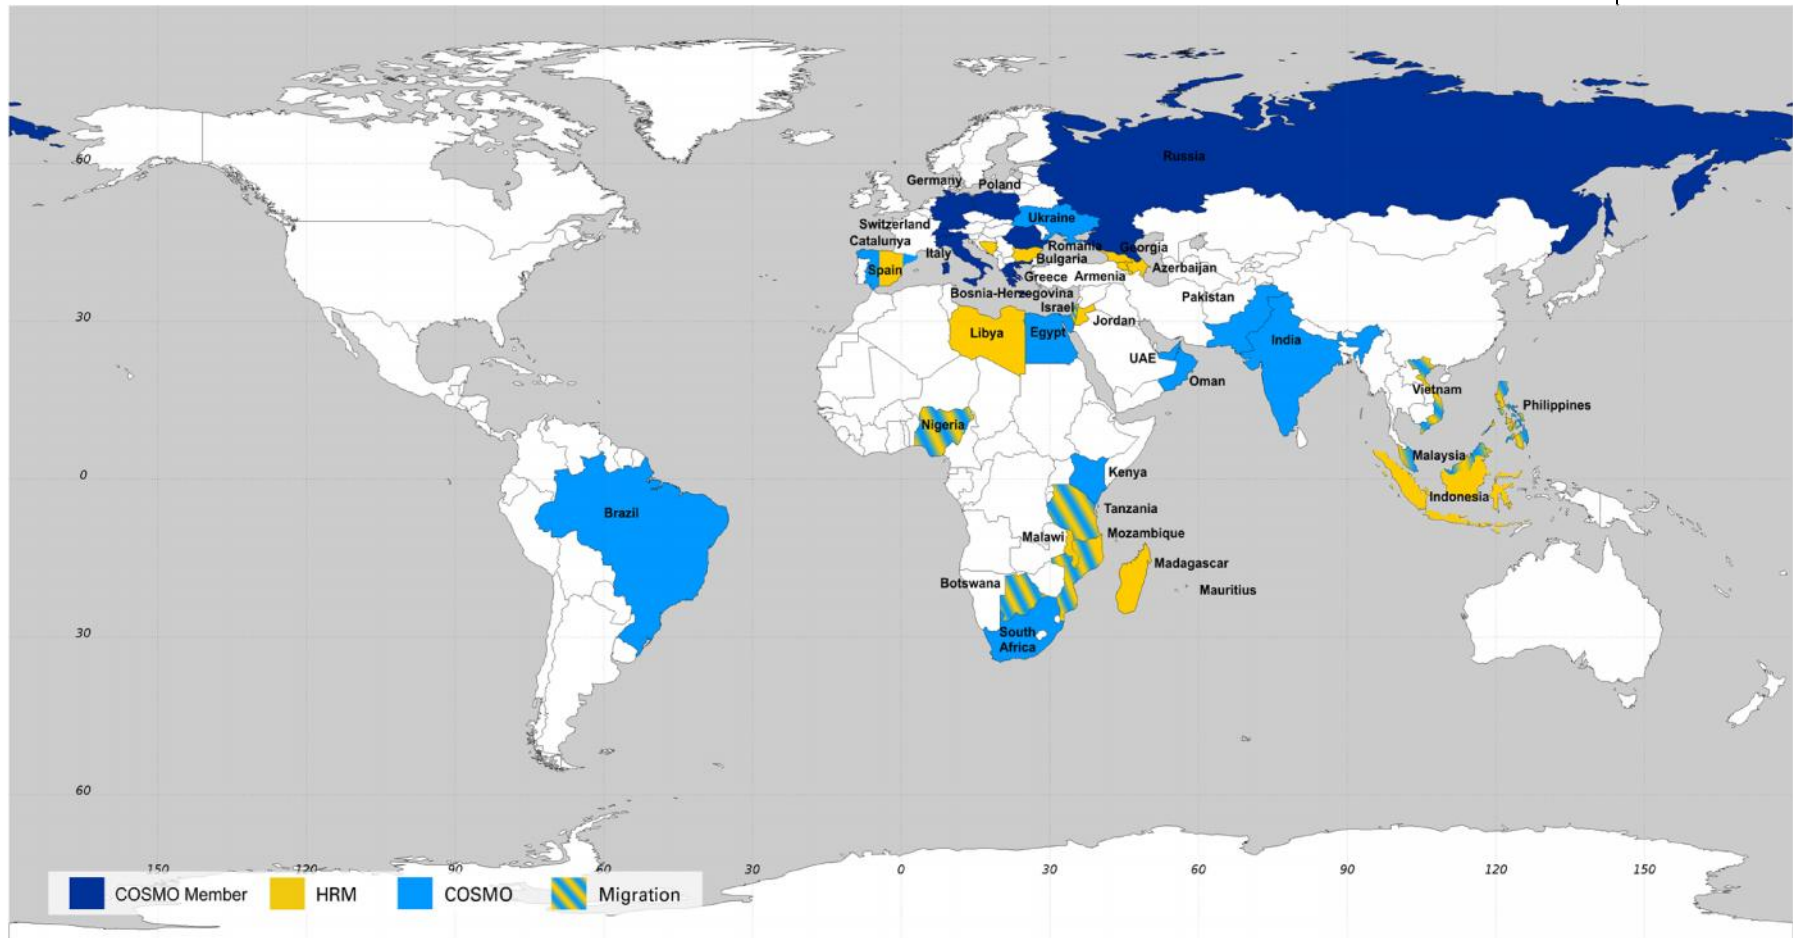

Migration HRM to COSMO

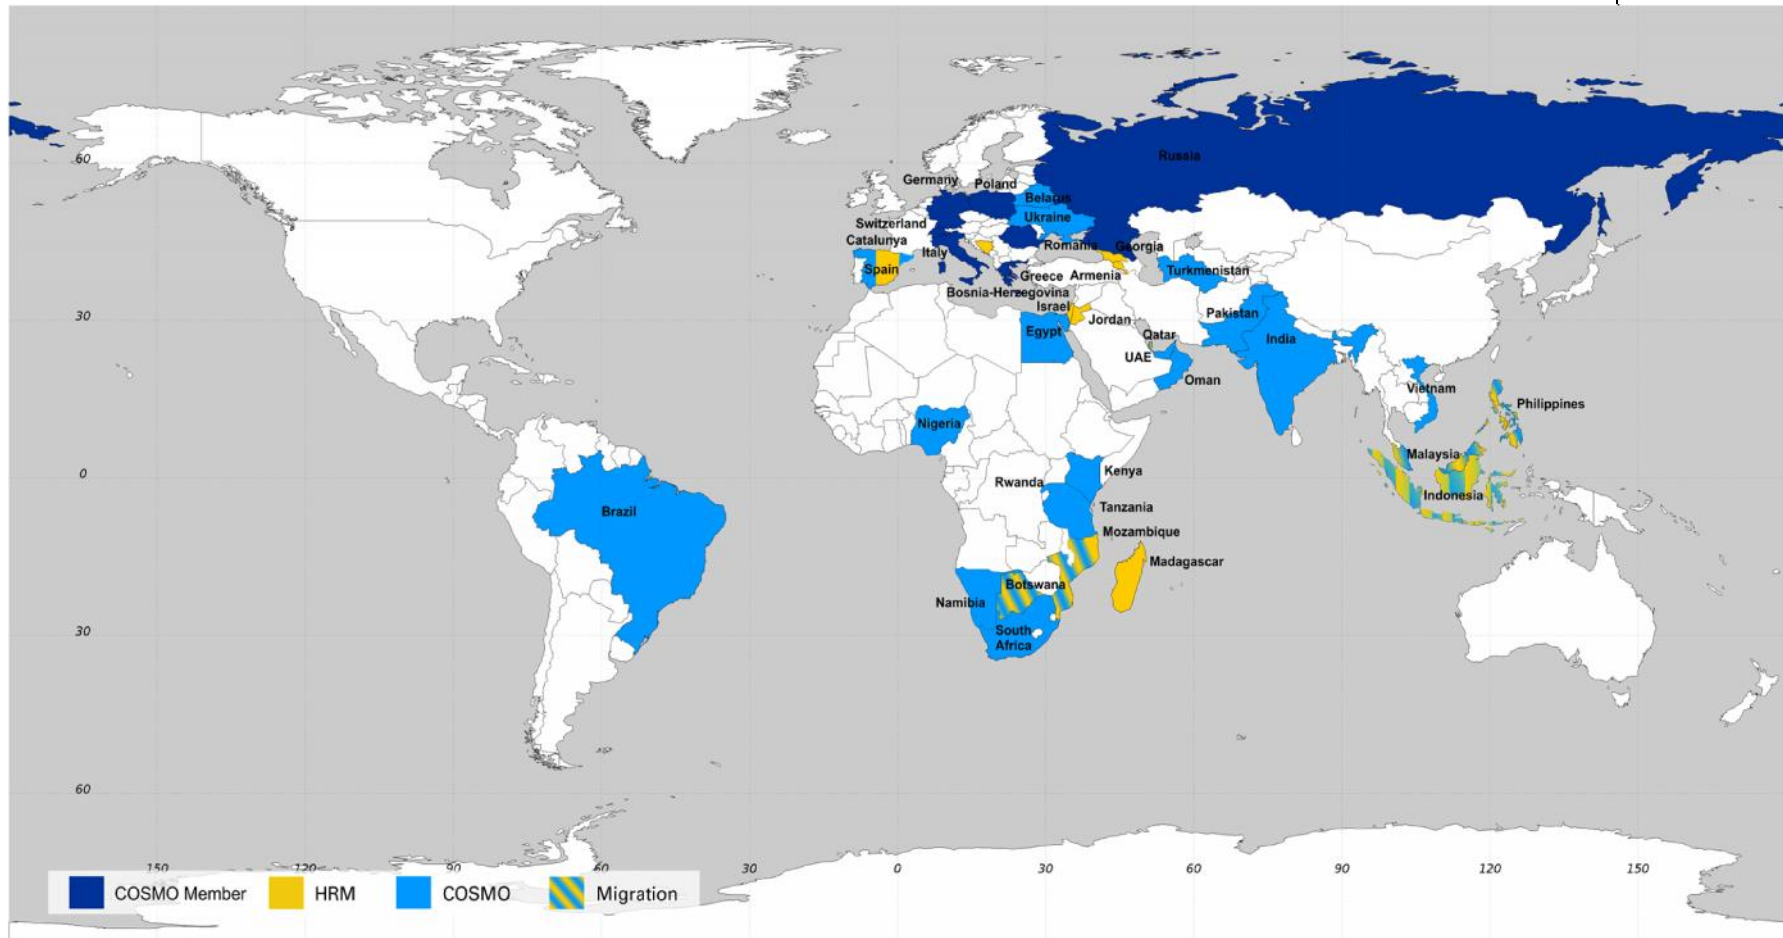

Map of model distribution until 2012

Map of model distribution beyond 2013

COSMO Licenses

- Scientific usage: Freely available to universities, research institutes and national weather services.
- Operational numerical weather prediction for non-COSMO members:

Free for weather services in developing countries as well as for research institutions;

otherwise: Annual fee of 20.000 €;

Payed licenses: Brazil (INMET), Brazil(NAVY), Catalunya (SMC), Oman (DGMAN), United Arab Emirates (NCMS), Namibia (will start from 06/2013), Turkmenistan (will start from 06/2013), South Africa(2013), Qatar(2013), Malaysia(2013)

Priority Task – “Support of COSMO licenses”

HRM users map:

HRM users on July 2011

- Armenia
- Bosnia and Herzegovina
- Botswana
- Brazil
- Bulgaria
- Eurasia
- India
- Indonesia
- Iran
- Israel
- Jordan
- Kenya
- Libya
- Madagascar
- Malaysia
- Mozambique
- Nigeria
- Oman
- Pakistan
- Philippines
- Republic of Mauritius
- Romania
- Spain
- Tanzania
- United Arab Emirates
- Vietnam

Priority Task – “Support of COSMO licenses”

Main issues of the sub-task:

- Starting from September 2011, NMA Romania has been involved in the COSMO User Support Activities priority task:
 - supporting new COSMO users during the implementation phase through e-mail assistance and by remote access to their computer system;
 - helping the COSMO users to set up their operational COSMO applications;
 - further activities to facilitate installation and use of the COSMO - Model and the INT2LM software.
- As part of these activities, Romania offered support for sequential compiling without data assimilation of the model
- Requirements:
 - Fortran compiler: gfortran (vs. > 4.5); C compiler: gcc
 - DWD-libgrib1_110128.tar.gz
 - int2lm_110311_1.18.tar.gz & cosmo_110525_4.18.tar.gz

Priority Task – “Support of COSMO licenses”

Training support:

- Training new scientific users during the annual "COSMO User Training" in February in Langen, Germany
- Training new operational COSMO model users during the annual "Capacity Building in Regional Modelling"
 - two of the Romanian researchers, Mrs. Rodica Dumitrache and Mr. Cosmin Barbu attended the *Capacity Building in Regional Modelling* in Langen, between 16th - 27th July 2012, as trainers;
 - assisting the students in implementing the COSMO model on their personal computers and running test cases for domains which covered their area of interest.

Priority Task – “Support of COSMO licenses”

Web support:

- Creating a Frequently Asked Questions (FAQ) page for COSMO model installation issues

CONSORTIUM FOR SMALL SCALE MODELING

COSMO Support FAQs

March 2012

In 2011, the maillist cosmo-support@cosmo-model.org was created to receive questions about installation and running the INT2LM & COSMO models. This is a compilation of the most common and frequently asked questions directed to it, along with their answers.

Q: COSMO run error

```
PROGRAM TERMINATED BECAUSE OF ERRORS DETECTED
TN ROUTINE: org_gma_interpol
ERRCR CODE is 5051
ERRCR: Not all data available
```

A: In the &CONTROL namelist set the following variables:

```
!multi_layer_in=.TRUE.
!multi_layer_lm=.TRUE.
```

Q: int2lm run error: wrong grid for LM external parameters

A: Minimize the model domain.

Q: int2lm run error:

```
PROGRAM TERMINATED BECAUSE OF ERRORS DETECTED
IN ROUTINE: int2lm_org
ERRCR CODE is 3
error in gxbini
```

E-mail support:

- cosmo-support@cosmo-model.org

Priority Task – “Support of COSMO licenses”

Supported countries:

Support of COSMO Licenses – 2011 COSMO year

- Armenia
- Botswana
- Burkina Faso
- Egypt
- Ethiopia
- India
- Indonesia
- Iran
- Iraq
- Jordan
- Kenya
- Nigeria
- Pakistan
- Philippines
- Rwanda
- South Africa
- Tanzania
- Ukraine

Priority Task – “Support of COSMO licenses”

COUNTRY	PROBLEMS / STATUS
Armenia	<p>Problems</p> <ul style="list-style-type: none"> ✓gme2hrmV2.8 installation error ✓wrong <i>bitmap</i> file and domain settings ✓hrm compiling error <p>Status: Pending</p>
Botswana	<p>Problems</p> <ul style="list-style-type: none"> ✓wrong or no INPUT files ✓removing YU* files ✓wrong values for namelist parameters <p>Status: Successful implementation of the model.</p>
Egypt	<p>Problems</p> <ul style="list-style-type: none"> ✓domain for Egypt exceeded limits ✓wrong <i>invar*</i> file ✓wrong <i>bitmap</i> file ✓namelist parameters settings <p>Status: Successful implementation of the model.</p>
IBL (Slovakia)	<p>Problems</p> <ul style="list-style-type: none"> ✓where to get the binaries for the model ✓producing WETTER_WW field ✓compiling with Intel compilers <p>Status: Alex / Uli took over the task.</p>
India	<p>Problems</p> <ul style="list-style-type: none"> ✓int2lm compiling error ✓int2lm run error (namelist parameters set incorrectly) ✓COSMO model run error (namelist parameters set incorrectly) <p>Status: Successful implementation of the model.</p>

Priority Task – “Support of COSMO licenses”

<p>Iran</p>	<p>Problems ✓int2lm run error (namelist parameters set incorrectly) ✓COSMO model run error (namelist parameters set incorrectly) ✓explanations regarding the INPUT files Status: Successful implementation of the model.</p>
<p>Irak</p>	<p>Problems ✓ Linux version required to run the HRM and COSMO models Status: -</p>
<p>Jordan</p>	<p>Problems ✓COSMO model run error (namelist parameters set incorrectly) Status: Successful implementation of the model.</p>
<p>Kenya</p>	<p>Problems ✓compiling error (using an unavailable compiler, compiling without the required libraries) ✓compiling without the “-DNETCDF” option Status: Pending</p>
<p>Pakistan</p> <p><i>OBS: compiling with ifort</i></p>	<p>Problems - compiling with ifort ✓gfortran installation problems ✓compiling using gfortran (version older than 4.5) ✓using libraries which were not compiled with the same compiler as the model Status: Pending</p>

Priority Task – “Support of COSMO licenses”

<p>Philippines</p>	<p>Problems</p> <ul style="list-style-type: none"> ✓int2lm compiling error (using an unavailable compiler) ✓COSMO model compiling error <p>Status: Pending (unknown – they haven't answered back to our last email).</p>
<p>Rwanda</p>	<p>Problems</p> <ul style="list-style-type: none"> ✓using the GME-20km test data ✓how to compile int2lm ✓removing YU* files ✓preparing INPUT files (namelist parameter values and paths set incorrectly) ✓using COSMO with a new set of dates <p>Status: Successful implementation of the model.</p>
<p>South Africa</p>	<p>Problems</p> <ul style="list-style-type: none"> ✓compiling the COSMO model (errors and necessary libraries, warnings) ✓using the <i>invar*</i> file ✓preparing the INPUT files ✓exporting necessary libraries ✓removing YU* ✓because of the big size of the domain, suggestion of running the model for a smaller domain ✓identifying output directories ✓suggestions regarding the use of grads <p>Status: Successful implementation of the model.</p>

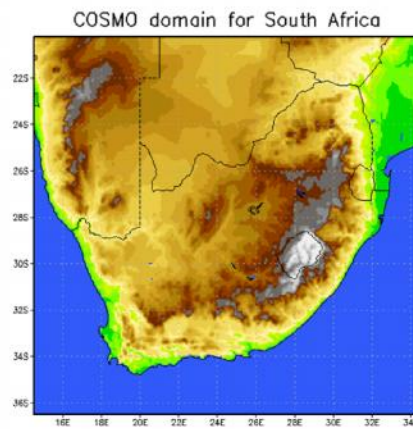

Priority Task – “Support of COSMO licenses”

Tanzania	Problems <ul style="list-style-type: none">✓removing YU* files✓exporting library paths✓setting namelist parameters correctly✓interpolation to be done for exactly the same period of time as the one for running the model (ex: if the model is run for 6 hours, run the interpolation for 6 hours) Status: Successful implementation of the model.
United Arab Emirates	Problems <ul style="list-style-type: none">✓convert grib data to Vis5D (not available directly from the COSMO model)✓COSMO model run error Status: Alex / Uli took over the task.
Ukraine	Problems <ul style="list-style-type: none">✓problems with parallel running of the model Status: Alex / Uli took over the task.
Ethiopia	Status: On-going

Priority Task – “Support of COSMO licenses”

Examples of COSMO domains:

Priority Task – “Support of COSMO licenses”

Conclusions:

- The COSMO model has been successfully implemented in most countries which migrated from the HRM model;
- The training activities help potential users to get better acquainted with the COSMO model;
- All these activities can improve the communication between the COSMO consortium and the users of the model;
- Romania will be able to go on providing support in implementing the COSMO model to new users in 2012 – 2013 and participate with permanent activity in the “*SuPpoRT Activities*” priority task.

Thank you for your attention!
