# **Overview of ongoing land model developments within the CLM-Community**

Synthesis collected by E. Davin

# CLM Community Organization

# CLM Community

## Collaboration with COSMO

- Good information exchange between SOILVEG and COSMO WG3b
- Joint SOILVEG/WG3b meetings (COSMO/CLM user seminar)
- Common tool for documenting model developments:  
<http://www.cosmo-model.org/content/model/releases/developments.htm>

WG3b				description	technical	testing	documentation
0.1	stop	N/A	Scale separation for Z0 and SSO	N/A			N/A
0.5	work	N/A	Tiles and Mosaic Approach	Machulskaya / Helmert (DWD)			N/A
0.4	work	N/A	Multi-layers snow model	E.Machulskaya			2012-02-01
0.2	evaluate	N/A	Orographic radiation correction	TBD			2012-09-01
0.3	work	N/A	Mire parametrization	A.Yurova			2012-12-01

# CLM Community

## TERRA

- Talk by JP Schulz

# CLM Community

## Community Land Model

- **Subroutine coupling :**
  - COSMO-CLM (various versions) coupled to CLM3.5
  - Currently in use within various projects, but no plans to implement it in official COSMO code
- **OASIS coupling :**
  - Uses OASIS3-MCT as external coupler
  - Upgrade to CLM4.0/4.5
  - Still under testing
  - Code will be distributed via the redmine server
  - Ongoing work to implement “unified interface” (OASIS PG)
- **Tutorial will be proposed at the next COSMO training course (Feb. 2014)**

# CLM Community

## Intercomparison TERRA\_ML / CLM3.5

- Comparison COSMO-CLM coupled to TERRA\_ML / CLM3.5 for Europe (*Davin et al., Clim. Dyn., 2011; Davin and Seneviratne, Biogeosciences, 2012; Lorenz et al., JGR, 2012*)
- Further comparisons for Europe, Africa, South America, Australasia are under discussion

# CLM Community

## Veg3D

- Coupling COSMO4.8-CLM19/Veg3D using OASIS3-MCT
- Technically working
- Scientific evaluation underway (Africa and Europe)

# CLM Community

## URBMIP

Name	TEB alongside TERRA_ML	TERRA-URB	TERRA-ML / BEP
Responsability	Kristina Trusilova	Hendrik Wouters	Sebastian Schubert
Features	inner building temperature snow model, water skin layer roofs/walls/roads, tiled urban fraction	Direct representation of the urban landcover in TERR-ML using a tile approach, new surface-layer transfer coefficients, thermal capacity, anthropogenic heat and impervious surface interception distribution	Street canyon model advanced double-canyon radiation scheme, shadows, radiation trapping, roof/wall/ground fluxes; coupled with the PBL scheme not only through surface fluxes but also by means of energy and momentum fluxes in layers above the surface
Input		Urban fraction (EEA), annual mean anthropogenic heat (NCAR)	Full 3D cityGML
References	Trusilova et al 2008, Masson 2001	Wouters et al. 2013, Wouters et al. 2012, Flanner 2010, Demuzere et al. 2008, De Ridder, 2012	Schubert et al. 2012, Martilli et al. 2002, Gröger et al. 2008
Aims	Urban climate of Europe and Germany	urban climate and its impact on Air-quality simulations Flanders Belgium	Urban climate of Berlin and Basel

# CLM Community

## TERRA\_URB

- Urban parameterization in COSMO-CLM/TERRA-ML was successfully implemented and tested on 1km resolution over Belgium
  - The temporal and spatial variability of the UHI intensity are very well reproduced
  - Additional computational cost was negligible (+3% CPU-time)
  - Number of needed extra parameters is small and readily available globally
- Proposal to the SMC to include this development in the official COSMO code (Kristina Trusilova from DWD as possible responsible person)

# SRNWP data pool

# Data pool action

- Access from COSMO web, password protected  
<http://www.cosmo-model.org/srnwp/content/default.htm>
- Currently **9 sites**, data from **2006-2012**, in a **common ASCII format**
- **Soil, surface** and **BL** observations
- Work done at DWD / Lindenberg (C.Heret)

# Data pool action

## Status

- Data available from start of the action to end 2012 from **Cabauw** (NL), **Capofiume** (IT), **Lindenberg** (DE), **Payerne** (CH), **Sodankyla** (FI)
- Waiting for (some) 2012 data from **Fauga-Mauzac** (FR), **Cardington** (GB)
- New site **Valdai** (RU)  
... but no fluxes measurements, no soil measurements ... work in progress
- Very few data for **Debrecen** (HU)

- **The SMC recommends following this action**
- Are more resources needed for this action (→ StC) ?
- Is it ok to keep the responsibility for this action in COSMO ?

**Thank you for your attention!**
