Technical Reports

6 to be published, as usual for finished PPs:

- COLOBOC (Bettems, MCH)
- CDC (Baldauf, DWD)
- LMZ (Schaeffler, DWD)
- UTCS (Mironov, DWD)
- 1DVAR (Hess, DWD)
- SATCLOUD (Hess, DWD)

Miscellaneous

- TAG page updated with agendas and minutes of the meetings
www.cosmo-model.org/content/consortium/tag/meetings
- New mail lists created: cosmo-tag@cosmo-model.org, cosmo-extpar@cosmo-model.org, cosmo-calm@cosmo-model.org
- The WG-related pages that were password-protected became public
- A new page about COSMO model licensing policies for "external" users was added

www.cosmo-model.org/content/consortium/licencing.htm

- The priority projects CELO and CORSO were introduced in the site

www.cosmo-model.org/content/tasks/priorityProjects/celo

www.cosmo-model.org/content/tasks/priorityProjects/corso

Miscellaneous

- A lot of pages became editable and a manual for editing files of the site is placed in the miscellaneous documents page

www.cosmo-model.org/content/model/modules

- WG work plans and PP task lists with the same fields as the model-development (MD) pages (1-entry: WG/PP → MD)

www.cosmo-model.org/content/tasks/workGroups/workPlan.htm

- Introduction of a checkbox with a "simple output in new window" caption in WG, PP and Model Management pages. If this is checked, the table you request will appear in a new browser tab, in a very simple form: as a sequential 2-column list with no buttons or hidden texts or any fancy format that would normally apply in the site. This page is stand-alone. You can click "file->save as" to store it locally

Open questions

Web mirror !

The Swiss mirror is practically defunct (cit. Andreadis) since its disk space is exhausted. There are contacts between Marco Consoli and Theodore Andreadis for solving the problem (moving to a new virtual machine ?).

Any other request/need/demand ?

Thanks you for your attention !
