

TERRA developments

- **1 PhD @ MCH/ETHZ, 2 PhD @ Uni Giessen**
→ need for coordination with developments at DWD
- **Code basis is COSMO / TERRA**
→ is it a problem (dev at DWD now focus on ICON / TERRA only)?
→ how to guarantee pertinence for ICON / TERRA?
- DR: Found a very high sensitivity of fluxes on soil types (i.e. for clay)! Seems unrealistic. Are you aware of this issue?
- DR: What further changes to TERRA are to be expected from the DWD side? On what time scales?
