# Web/Documentation

- Improved the latex template for Technical Reports
- New page on ICON Tech Reports in the Documentation menu
- Documentation Part V (preprocessing) and VII (user guide) updated together with the Release Notes page and the EMVORADO User Guide
- NWP Test Suite report about COSMO ver 5.08 vs 5.06 and ICON ver 2.6.1 uploaded
- Tech Rep 43 (“The COSMO Priority Project T<sup>2</sup>(RC)<sup>2</sup>”) uploaded
- Update of MCH operational page
- New page about “ICON Transition” in the home page
- New page added about ICON tuning parameters (access from WG3a and WG7 pages):

<https://www.cosmo-model.org/content/support/icon/tuning/>

# Other business

- “Update of Common Plot Activity Content through WG6-SPRT 2021/22” was submitted to the STC 22.07.2021. [Decision is due in September 2021](#)
- PP CEL-ACCEL: waiting for news from Zbig
- COSMO-LEPS: waiting for Ines to come back according to SMC and STC decision
- Expected TRs during the COSMO year: PP KENDA-O, **PP CDIC**, PP EX-CELO, PP CEL-ACCEL, PP APSU, PP AWARE, PP CALMO-MAX, PP CARMA
- DACE user manual to be updated

# Important communication

In the following months, I will change workplace, from Arpa Piemonte to CIMA Research Foundation ([www.cimafoundation.org](http://www.cimafoundation.org)).

My work in COSMO won't stop because CIMA will join the Consortium (in agreement with our National Met Service), therefore everything is transparent from the COSMO point of view.

## EXCEPT THE EMAIL ADDRESS

Please, from now on use the new one (is already active):

**[massimo.milelli@cimafoundation.org](mailto:massimo.milelli@cimafoundation.org)**

**Thanks for your attention and for your work !**  
**(Hope to drink a beer with you in the near future)**
