CLM Community members and institutions

CLM-Community WORLD

- Algeria: 1
- Brazil: 2
- Burkina-Faso: 1
- China: 3
- Egypt: 1
- India: 2
- Iran: 1
- Israel: 2
- Mexico: 1
- Nigeria: 3
- Pakistan: 1
- Russia: 2
- Saudi Arabia: 1
- Senegal: 1
- South Korea: 1
- Swasiland: 1
- United Arab. Emir.: 1
- USA: 3
- Vietnam: 1
- Zimbabwe: 1

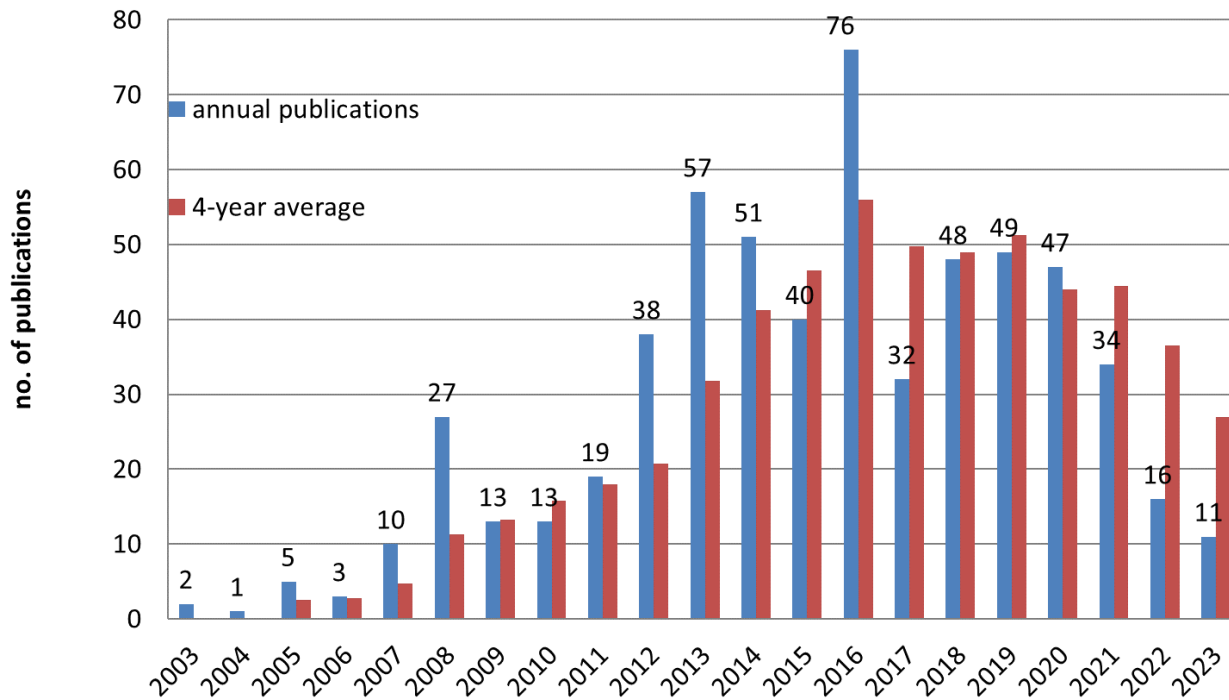

CLM-Community EUROPE

- Austria: 4
- Belgium: 3
- Cyprus: 1
- Germany: 26
- Greece: 2
- Ireland: 1
- Italy: 2
- Luxembourg: 1
- Norway: 3
- Poland: 1
- Spain: 1
- Switzerland: 4
- Turkey: 2
- UK: 2

CLM Community development of publications

Meetings/Events 2024

ICCARUS:

04 - 07 March 2024 (hybrid meeting)

ICON training course:

10 – 14 June 2024

CLM Community Assembly:

07 – 11 (?) October 2024 (Oberpfaffenhofen, Germany)

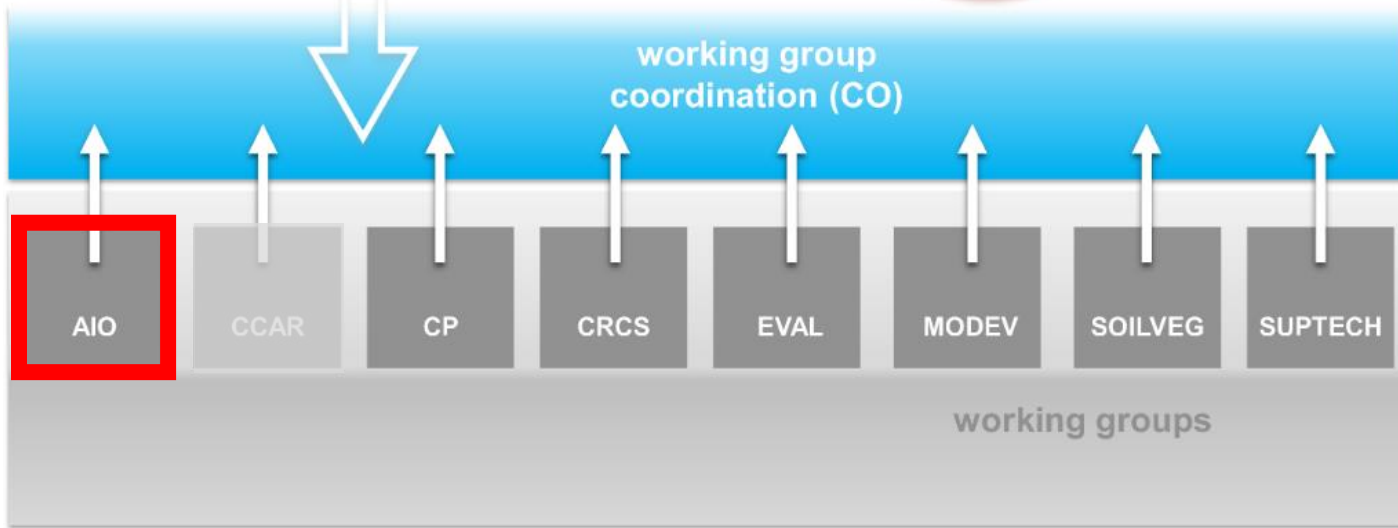

ICON Training 2023

- First ICON-CLM Training (27-31 March)
- First joined ICON Training (Met services, NWP Academia and CLM Community)
- Big effort to prepare the course. Many thanks to P. Singh (GUF), B. Geyer, H. Hagemann (Hereon), R. Petrik (Hereon/Navy), M. Tölle (Uni Kassel), P. Ludwig (KIT), Susanne Brienen (DWD)

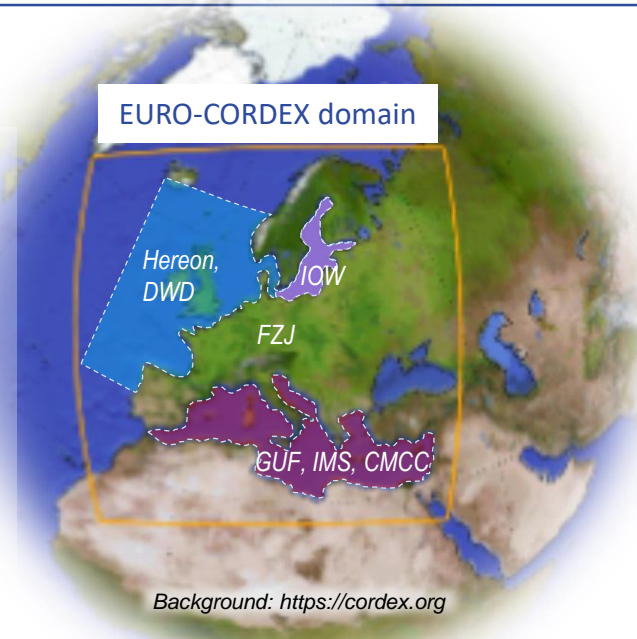

Scientific Advisory Board (SAB)

WG AIO

- Further develop the Regional Earth System Models (**RESMs**) of **COSMO-CLM** coupled to ocean models (**NEMO**, **MOM5**), hydrological discharge model (**HD**), wave model (**WAM**) via the OASIS3-MCT coupler for the EURO-CORDEX domain, with a focus on the North Sea and Baltic Sea regions (*Hereon*, *IOW*) and the Mediterranean Sea (*GUF*)
- Further develop the RESMs of **COSMO-CLM/ICON-CLM** coupled to the community land model (**eCLM**) and the groundwater model (**ParFlow**) via OASIS3-MCT (*FZJ*)
- Further development of the RESM including **ICON-CLM**, **NEMO** and **HD** coupled via OASIS3-MCT for the North Sea and Baltic Sea regions (*Hereon*, *DWD*)
- Set up a joint activity of **CMIP6** RESMs downscaling using the above mentioned RESMs for the EURO-CORDEX domain (*Hereon*, *DWD*, *IOW*, *GUF*, *FZJ*)
- New development of the regional coupled system model **ICON-CLM + NEMO_MED** for the Mediterranean Sea region (*IMS*, *CMCC*) with technical supports from *Hereon*, *DWD*, *GUF* (Germany) and *LMD*, *Meteo-France/CNRM* (France)

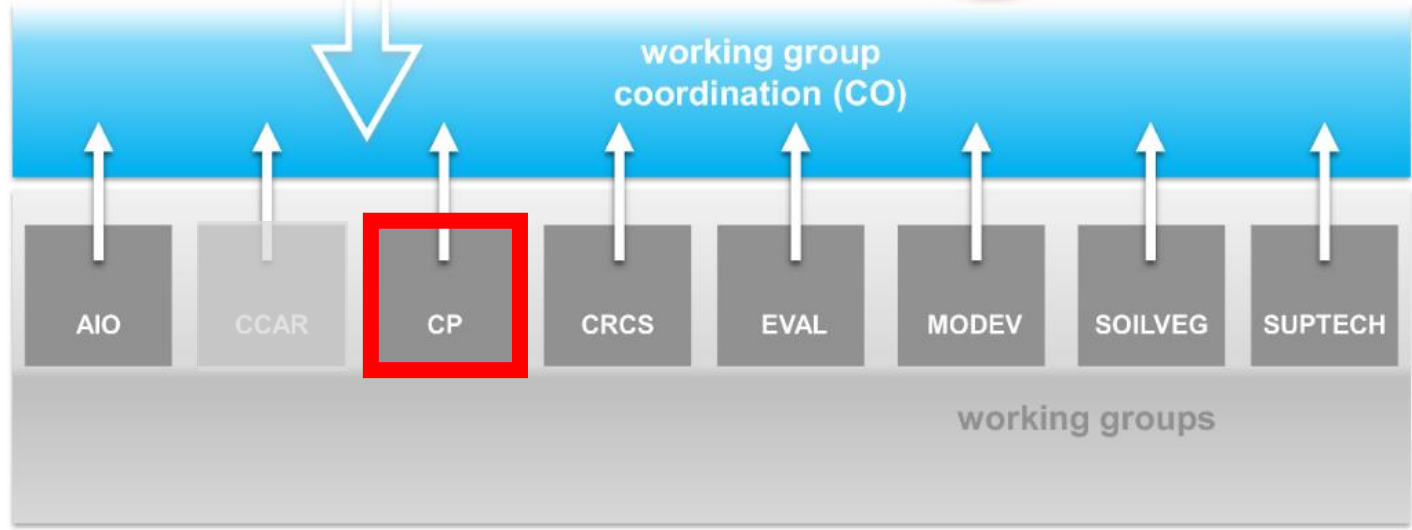

Publications:

- Grayek, S., Wiese A., Ho-Hagemann, H. T. M., Staneva, J. (2023): Added Value of Including Waves into a Coupled Atmosphere-Ocean Model System within the North Sea Area, *Frontiers in Marine Science* <https://doi.org/10.3389/fmars.2023.1104027>
- Karsten, S., ..., Ho-Hagemann, H. T. M., et al. (2023): Exchange-grid coupling approach for the IOW Earth System Model (version 1.04.00) of the Baltic Sea region, *Geosci. Model Dev. Discuss.* [preprint], <https://doi.org/10.5194/gmd-2023-166>, in review.

Scientific Advisory Board (SAB)

WG CP

- The CLM Community will participate in the “Balanced Ensemble Matrix” Experiment from CORDEX CMIP6

CMIP6 - EURO-CORDEX “balanced” matrix

X planned
X still to be placed

SSP126, SSP370

3 GCMs per RCM

4 RCMs per GCM

Project UDAG

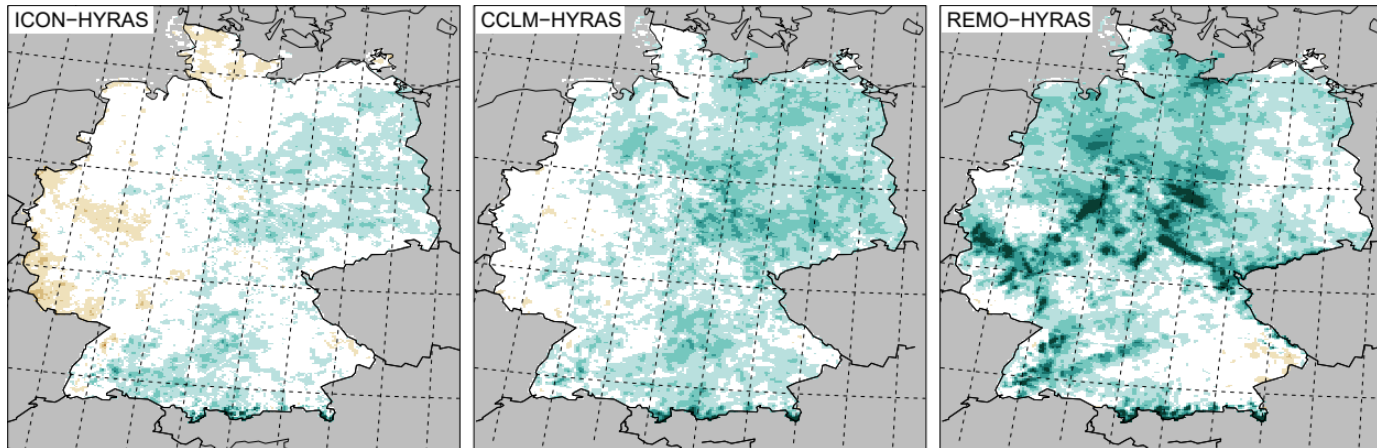

- UDAG – Updating the data basis for adaptation to climate change in Germany
- Funded by the German Ministry for Education and Research
- Start September 2023
- Participants: DWD, KIT, BTU, Hereon, DKRZ
- Test/Improve ICON-CLM configuration
- Produce simulations
- Postprocessing, standardization, publication and analysis of data

WG CP

- The CLM Community will participate in the “Balanced Ensemble Matrix” Experiment from CORDEX CMIP6
- The NUKLEUS project already generated downscaling simulations with CCLM6 and ICON-CLM from 3 CMIP6 GCMs (12.5km; historical and ssp370) as well further 3 km downscaling for Germany (historical and ssp370, 3 30-year time-slices)

Evaluation of the NUKLEUS climate simulation ensemble

- ERA5 driven hindcast runs (2005 – 2014): CPM simulations (3 km)
- Relative precipitation BIAS to HYRAS (DWD):

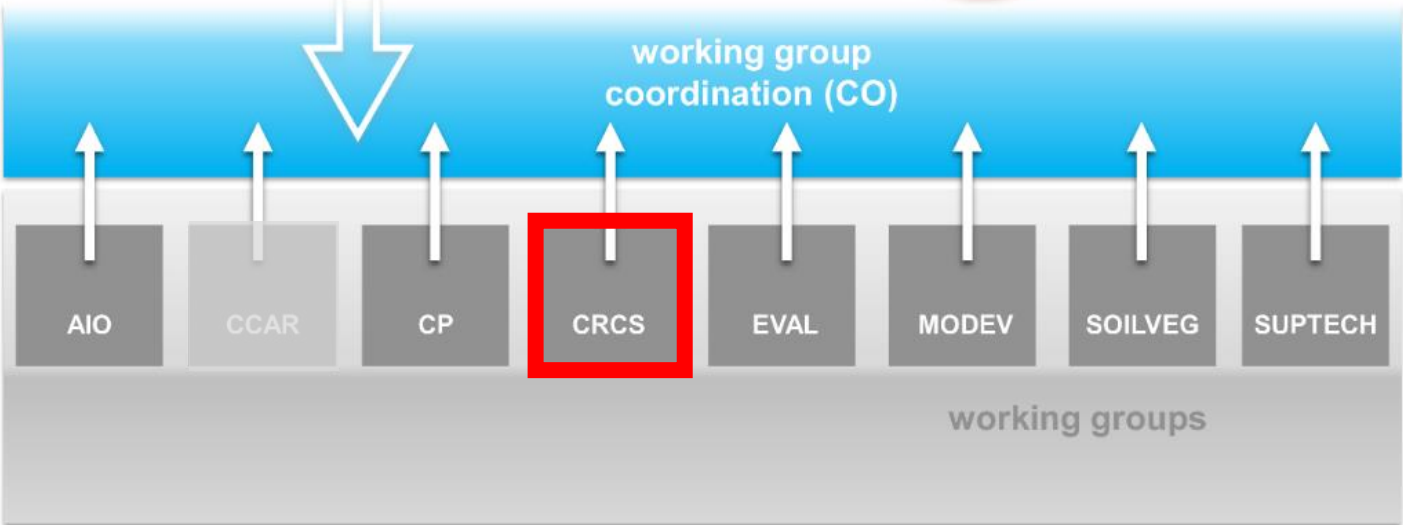

WG CP

- The CLM Community will participate in the “Balanced Ensemble Matrix” Experiment from CORDEX CMIP6
- The NUKLEUS project already generated downscaling simulations with CCLM6 and ICON-CLM from 3 CMIP6 GCMs (12.5km; historical and ssp370) as well further 3 km downscaling for Germany (historical and ssp370, 3 30-year time-slices)
- CORDEX Flagship pilot study on convection now finished (several CLM contributions)
- Ongoing contributions in FPS on land use changes and urban effects

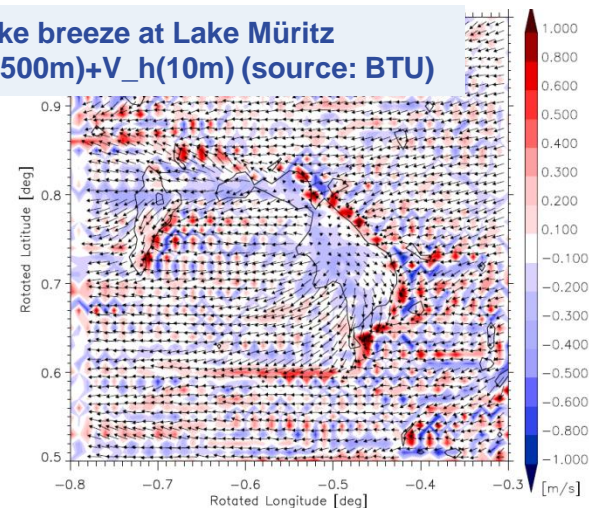

Scientific Advisory Board (SAB)

WG Convection Resolving Climate Simulations (CRCs)

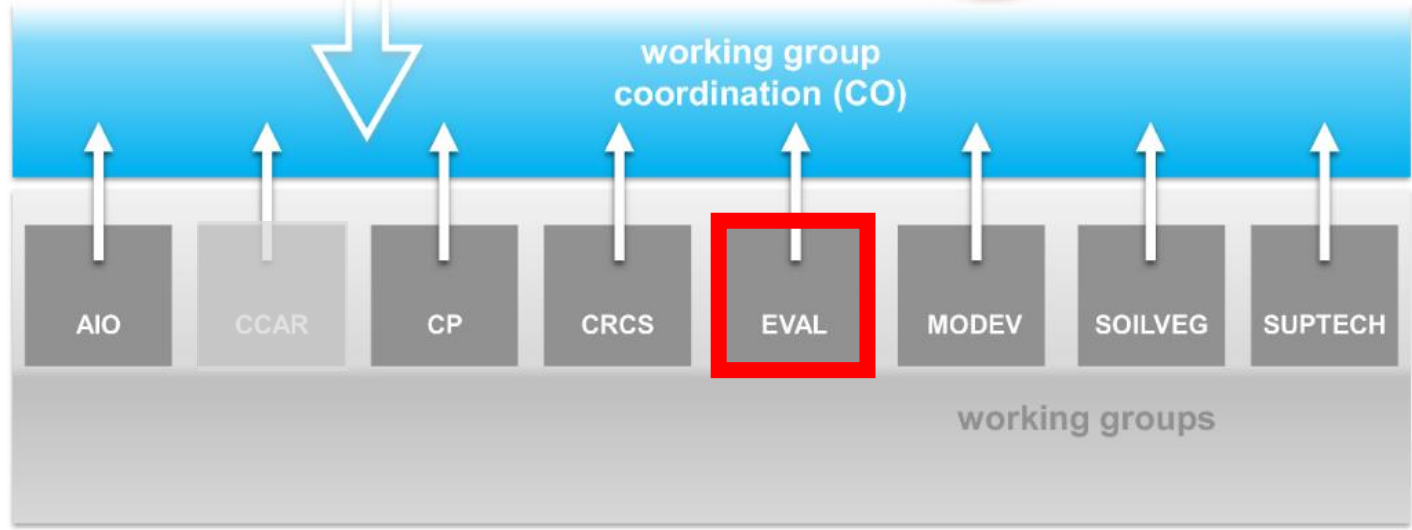

- **Aim:** Providing reliable information about climate and climate change on km-scale. Discussion of results, coordinated research, cooperation with natl. and intl. initiatives.
- **Coordinators (designated):** Andreas Will (BTU Cottbus, Germany), Klaus Gørgen (FZ Jülich, Germany)
- **Topics (selected):**
 - Applications of COSMO-CLM and ICON-CLM on convection permitting to resolving scales (e.g., in UDAG, CORDEX-FPSCONV)
 - Understanding of processes and mechanisms relevant for regional to local climate
 - Assessment of added value of higher grid resolution
 - Coordinated efforts, e.g., on model evaluation, configuration optimization, and identification of model deficiencies
 - Relevance (impacts, services hazards), e.g.: Water availability in regions, renewable energy potentials, and other key questions

Scientific Advisory Board (SAB)

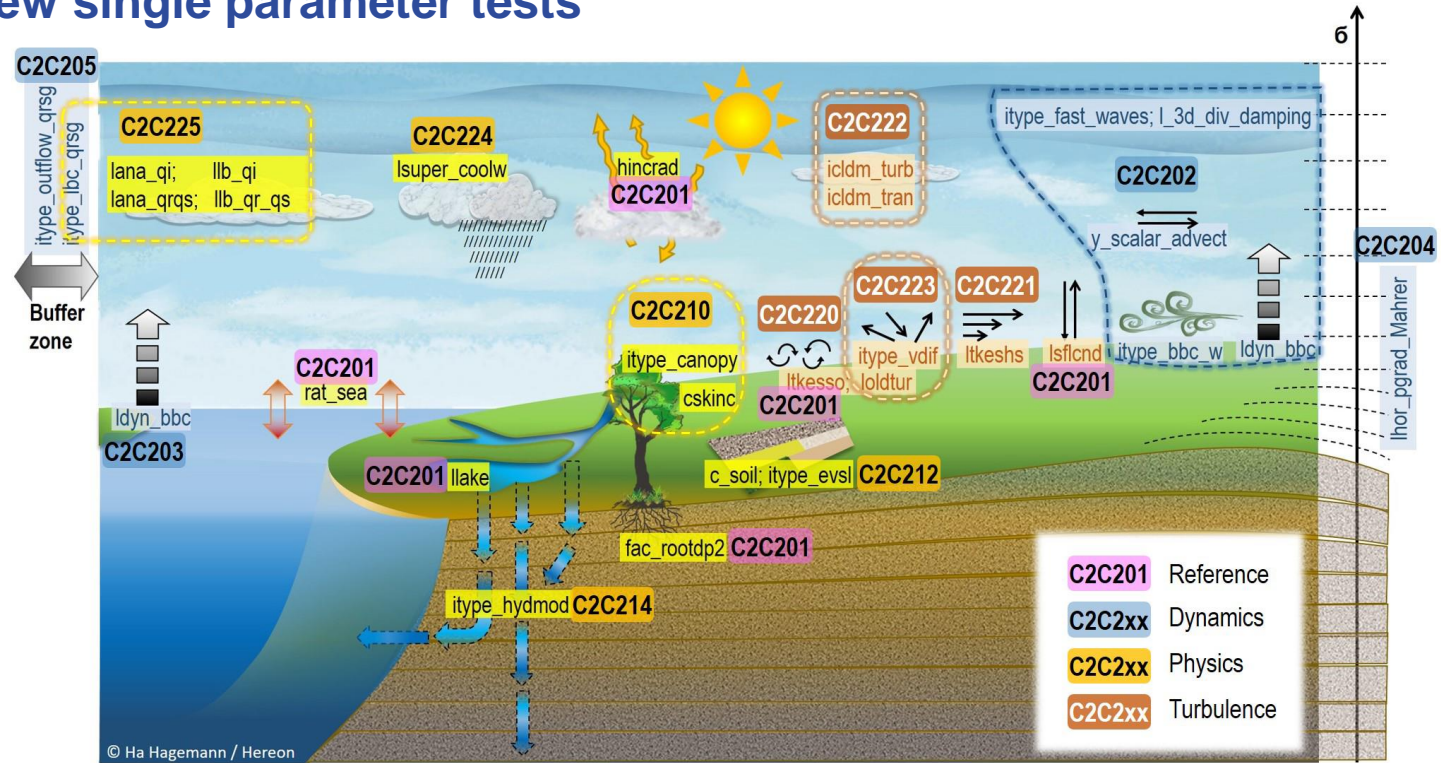

Activities of the EVAL WG

- ➔ Most of the Activities are related to COPAT2, and the calibration of COSMO-CLM 6.0 and ICON-CLM

Overview single parameter tests

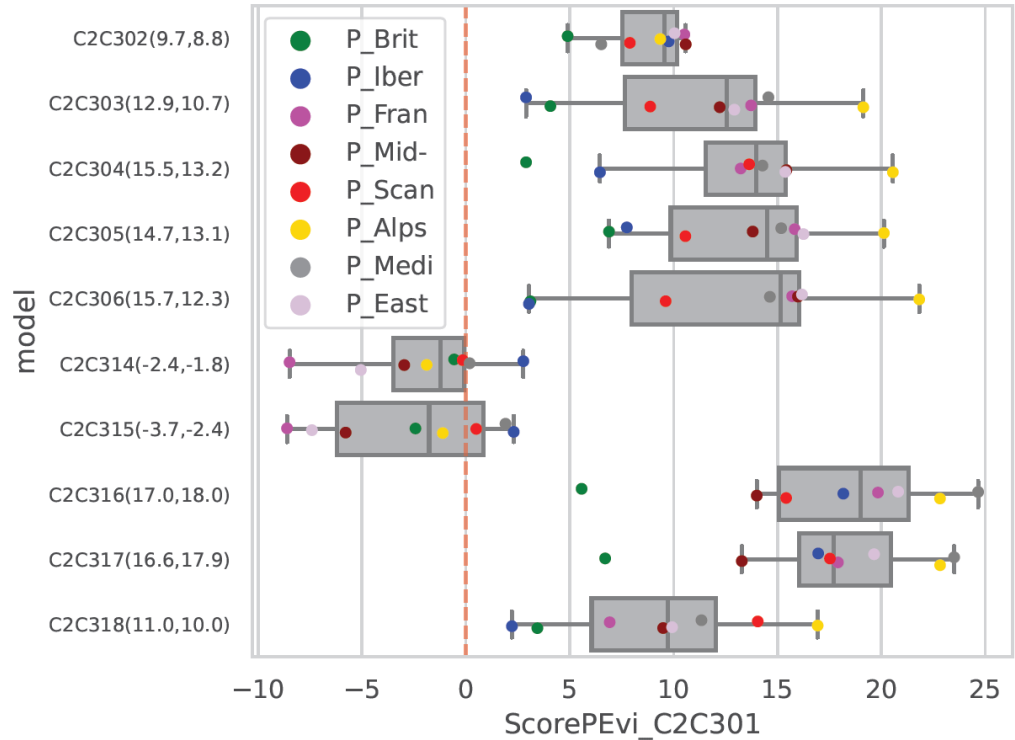

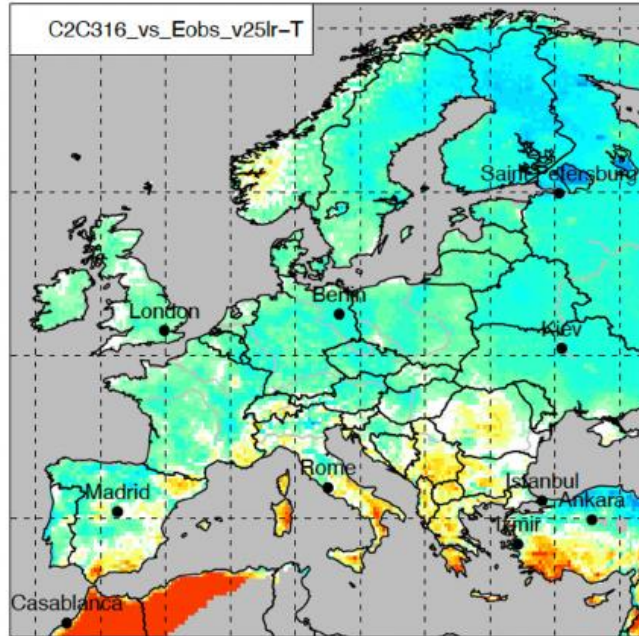

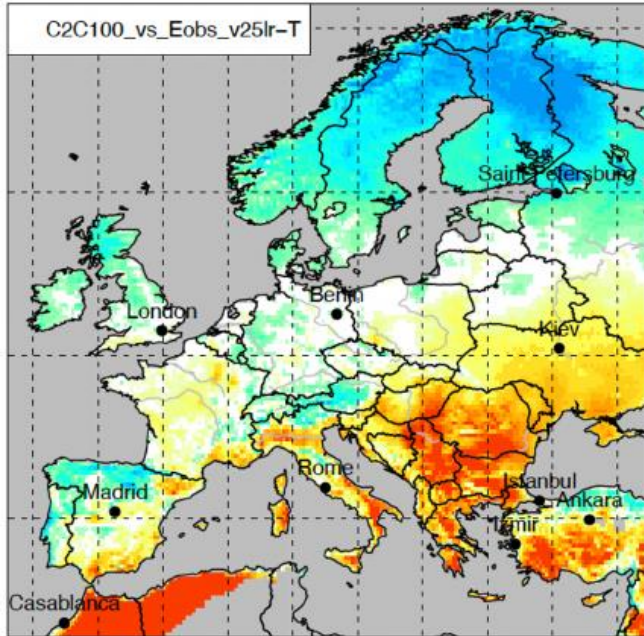

Prudence Regions

ScoPi all variables except precipitation

Mean 2 m
temperature bias
summer vs. E-Obs
for 1980 - 2010

Left: C2C100,
recommended
version from 2018

Right: C2C316

Activities of the EVAL WG

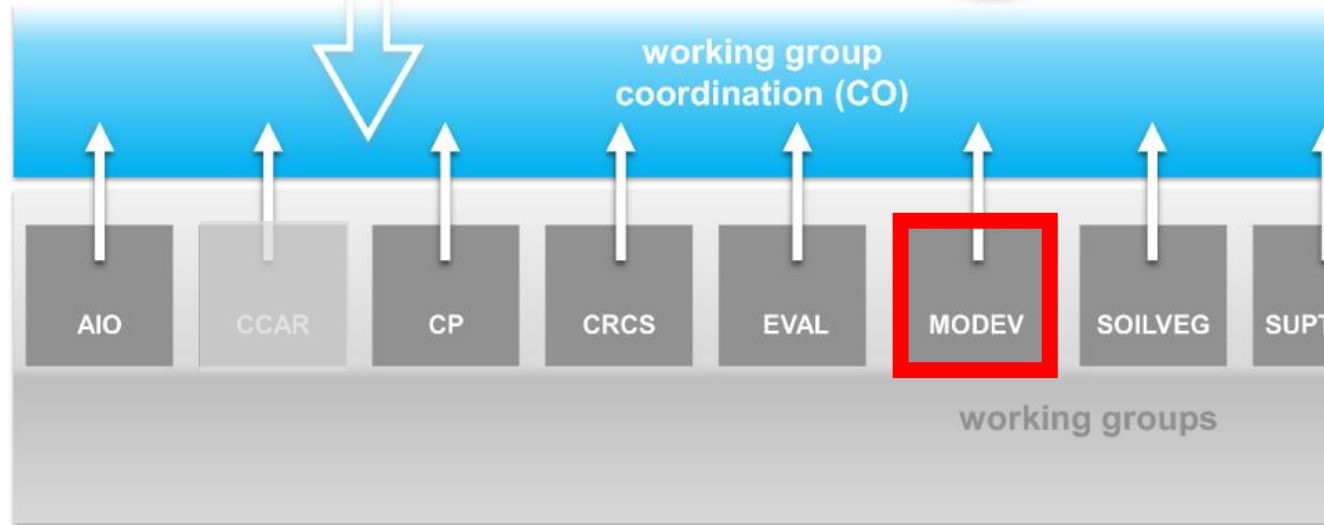

- ➔ Most of the Activities are inherent to COPAT2, and the calibration of COSMO-CLM 6.0 and ICON-CLM
- Reports on calibration activities to be published in COSMO Technical report series and peer-review journal

Activities of the EVAL WG

- ➔ Most of the Activities are inherent to COPAT2, and the calibration of COSMO-CLM 6.0 and ICON-CLM
- Reports drafting on calibration activities to be published in CLM Technical report series and peer-review journal
- ICON-CLM
 - Reference simulation with preliminary setup completed; base line for further tests
 - List for single parameter tests has been created: <https://www.clm-community.eu/wiki/eval/copat2/phase1i/>
 - Same procedure as for COSMO

Scientific Advisory Board (SAB)

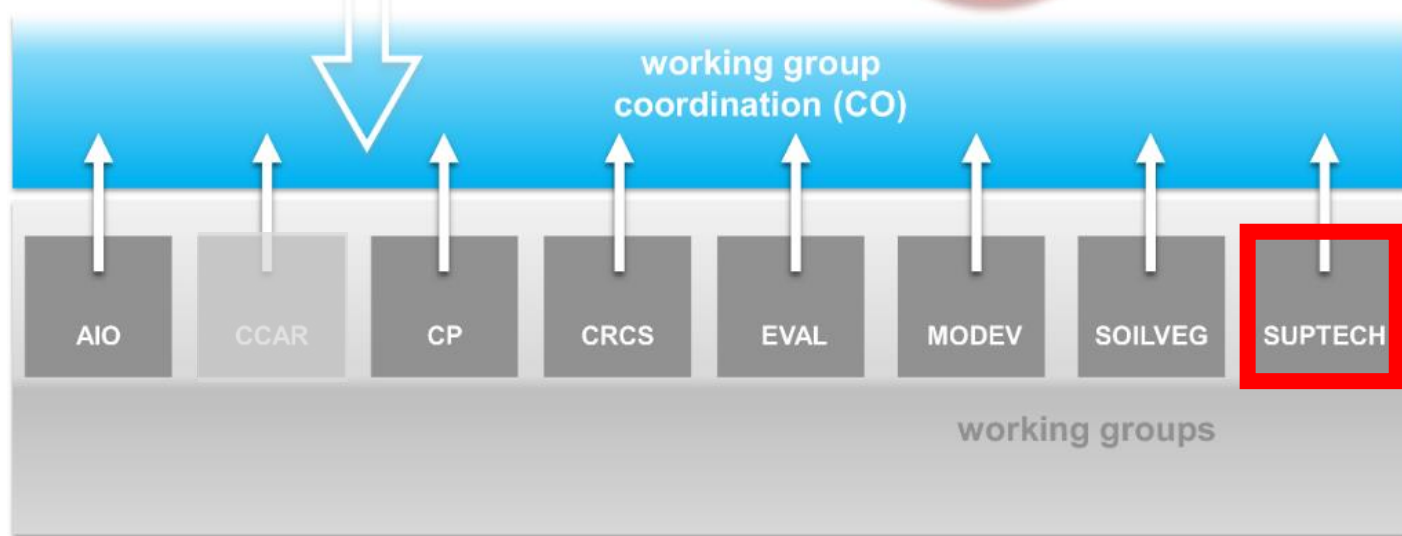

WG MODEV

- ICON-CLM has been available as a new community model for some time
 - PG-ICON was closed at the assembly in 2022
- WG MODEV has been installed instead to coordinate more continuous model improvements
 - addresses technical challenges related to icon-clm model development
 - closed group for all community members working on the model code
 - kick-off in February 2023, meeting every 2 months
 - currently 14 members of BTU, DLR, DWD, FU Berlin, FZJ, Hereon, IMS and KIT
 - co-ordination by Patrick Ludwig, Mariano Mertens, Vera Maurer

Scientific Advisory Board (SAB)

CLM Community Portal and WebPEP @ DKRZ

- Community Portal centralises former Webpage, RedC and administration tool. Thanks to Philipp Sommer and Beate Geyer (Hereon)!
- A lot of additional functionality:
 - Membership, topic and working group management
 - Event organization
 - Ticket System
 - Chat program
- WebPEP @ DKRZ
 - New frontend
 - EXTPAR backend moved to DKRZ
 - Discussion about unification with ICON Webservice started

Create CLM input data ?

Input

Origin Lon*
The geographical longitude of the origin (0,0) of the rotated system.

Origin Lat*
The geographical latitude of the origin (0,0) of the rotated system.

Dlon*
The grid mesh size in degrees in the rotated coordinate system in x-direction.

Preview

The preview function still needs some debugging! If you experience strange-looking polygons when rendering the preview and you need a preview, please then use the preview function in the [old webpep form](#).
