COSMO TAG Meeting - Thursday, July 9th 2015
14:30-16:30 CEST

Participants: **COSMO Software Administrators** (Uli Schättler (**US**), Jean-Marie Bettems (**JMB**), Antonio Vocino (**AV**), Daniel Lüthi (**DL**)), **TAG Coordinator** (Massimo Milelli (**MM**))**.**

Chair: Massimo Milelli (**MM**)

Invited: Theodore Andreadis (**TA**)**,** Xavier Lapillonne (**XL**)

Minutes: Massimo Milelli (**MM**)

Already excused: Uli Blahak (**UB**)

Agenda

1. Outcomes of the workshop on GRIB2 consolidation on May 21 (minutes sent by **US** on June 10 to TAG mailing list). Discussion about the proposed update of COSMO policy (see email of Uli S. on July 3 to TAG)

2. Technical Test Suite status after the meeting in March at CUS

3. Web pages modification after the SMC meeting.
   - The proposal has been uploaded in parallel pages: http://www.cosmo-model.org/content/model/mm_default.htm, http://www.cosmo-model.org/content/support/software/mm_downloads.htm
   - In general, there is a problem with the web update. Some pages are really old or not filled at all (http://www.cosmo-model.org/content/tasks/operational/default.htm or http://www.cosmo-model.org/content/tasks/priorityProjects/taskDetails.priv.htm). Cosmin Barbu offered to upload the information for PPs, but he needs the collaboration of the PP leaders

4. HNMS proposal for a new web server (document sent by **MM** on June 3 to TAG mailing list)

5. Bugzilla status (http://www.cosmo-model.org/tracker)

6. Revision Control System: in view of a new server which may permit to install more features, do our community really need this facility in the (near) future ?

7. Namelist tool: this tool has been recently improved by Andreas Will and Tom Seemann, it is in the CLM-community page but also is linked in our area. Any idea for the improvement of the tool is welcome (http://www.cosmo-model.org/content/tasks/operational)

8. "Scientific" version of COSMO, updates of coding standards with STELLA rules in C++ as decided during the latest SMC meeting, ICON participation in TAG, OpenACC tutorial

9. Next GM: TAG meeting ?

10. AoB
