# Table of Contents

### Editorial

*Marco Arpagaus* ................................. 1

### Working Group on Data Assimilation

1. The effects of T2m assimilation on surface fluxes in COSMO-I2
   *M. Galli, M. Milelli, C. Cassardo, M. Giorcelli* ...................... 3

2. Bias Correction of Humidity Measurements by Radio Sondes of Vaisala RS 92
   *K. Stephan, C. Schraff* ........................................ 22

3. LETKF for the nonhydrostatic regional model COSMO-DE
   *H. Reich, A. Rhodin, C. Schraff* ............................. 27

### Working Group on Physical Aspects

1. Introducing a sea ice scheme in the COSMO model
   *J.-P. Schulz* ............................................... 32

2. Testing of Snow Parameterization Schemes in COSMO-Ru: Analysis and Results
   *E. Kazakova, I. Rozinkina* .................................. 41

3. Preliminary results with very high resolution COSMO model for the forecast of convective events
   *A. Morgillo* .................................................. 52

4. Various Implementations of a Statistical Cloud Scheme in COSMO model
   *E. Avgoustoglou* .............................................. 61

5. COLOBOC - MOSAIC parameterization in COSMO model v. 4.8
   *G. Duniec, A. Mazur* ....................................... 69

### Working Group on Verification and Case Studies

1. 20th of July 2007 tornado - towards prediction
   *J. Parfiniewicz* ................................................. 82

2. Seasonal and monthly verification of COSMO-PL
   *J. Linkowska, K. Starosta* ................................... 89

3. Analysing mesoscale structures using the COSMO numerical weather forecast, case study - 9 Oct. 2010
   *A. Iriza, C. Barbu, R. Dumitrache, B. Maco, M. Bogdan* ........... 96

### Working Group on Predictability and Ensemble Methods

1. Increase of COSMO-LEPS horizontal resolution and its impact on the probabilistic prediction of precipitation events
   *A. Montani, C. Marsigli, T. Paccagnella* ......................... 104

2. A study on the spread/error relationship of the COSMO-LEPS ensemble
   *M. Salmi, C. Marsigli, A. Montani, T. Paccagnella* .............. 110

3. Initial condition perturbations for the COSMO-DE-EPS
   *C. Peralta and M. Buchhold* .................................. 115

4. Upscaled and fuzzy probabilistic forecasts: verification results
   *Z. B. Bouallègue* ............................................. 124
5 Climatic Local area Modeling Community

Evaluation of Central European and Eastern Alpine seasonal climate simulated with CCLM: double nesting vs. direct forcing techniques

*G. Georgievski, K. Keuler, A. Will and K. Radtke* ............. 133

Appendix: List of COSMO Newsletters and Technical Reports 143
