

External Parameters at DWD current status and new developments

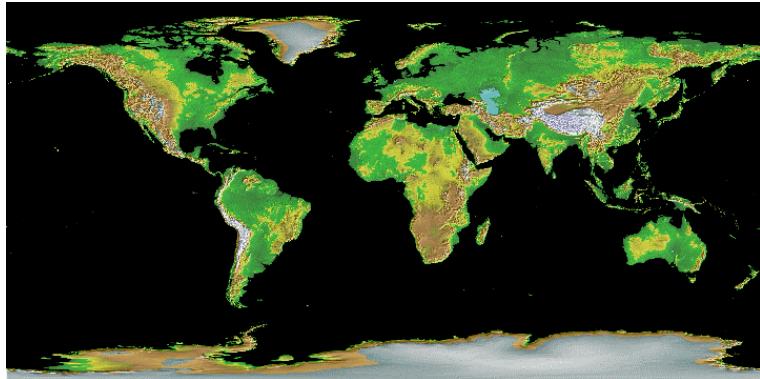

Hermann Asensio

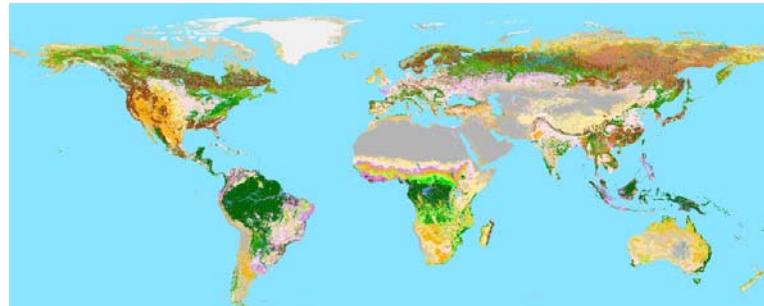

Outline

- raw data for external parameters
- current status of software system for external parameters
- planned extensions

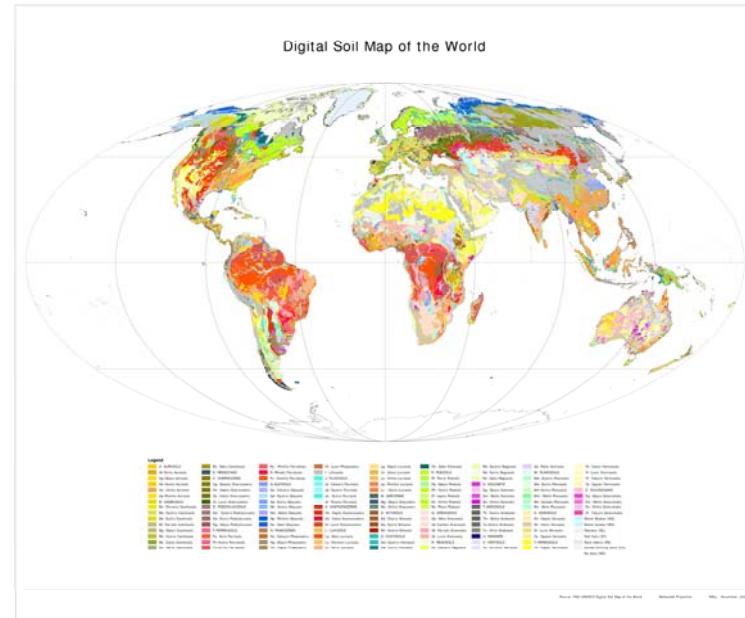

Currently used raw data for external parameters

GLOBE

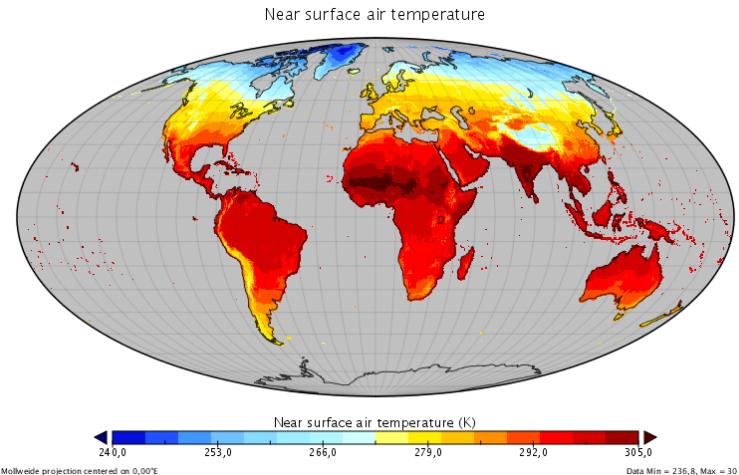

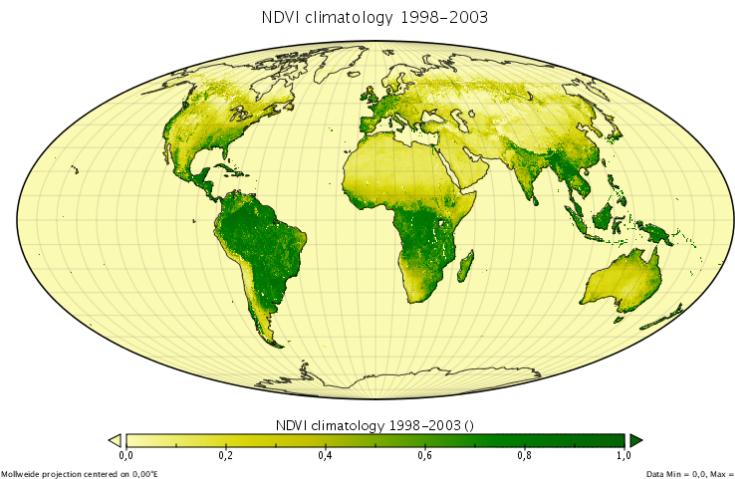

GLC2000

DSMW

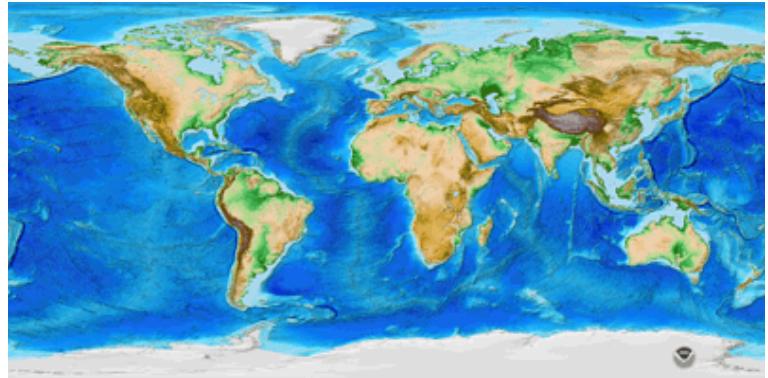

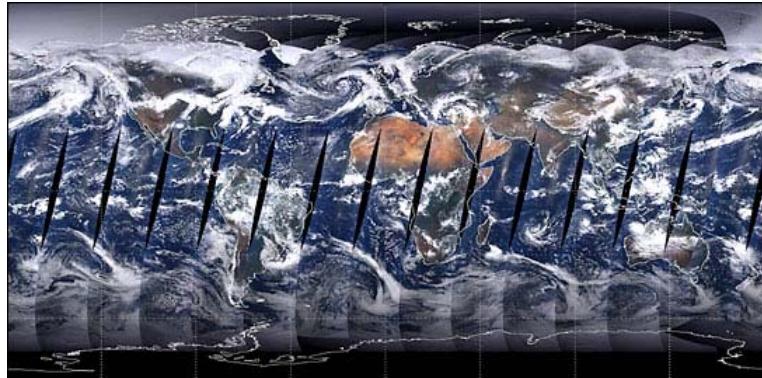

additional raw dataset

- NDVI
- climatology of near surface temperature
- lake database

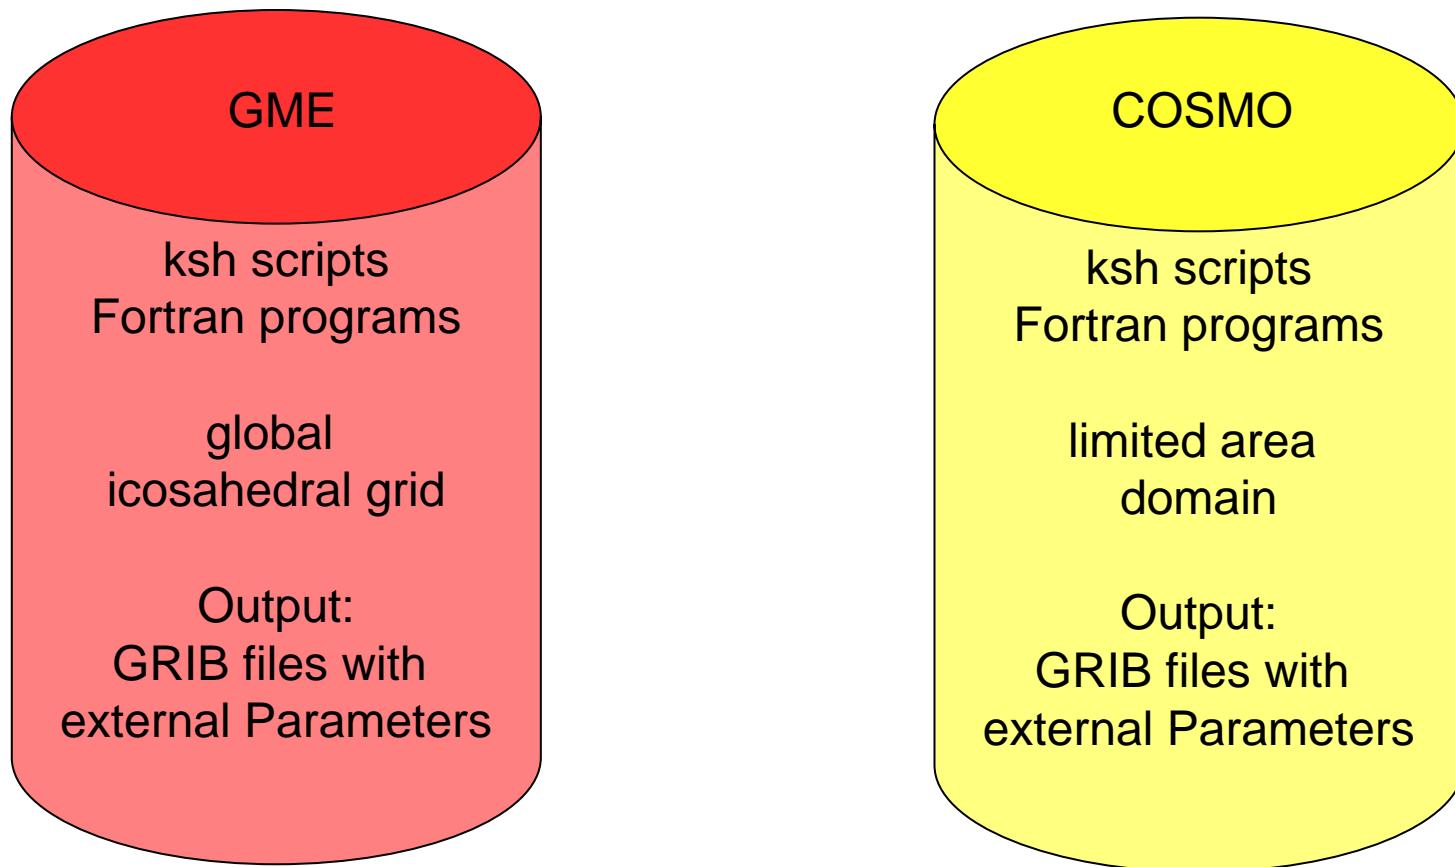

alternative raw dataset

- Harmonized World Soil Database
- Modis data for albedo (?)
- ETOPO1 (?)

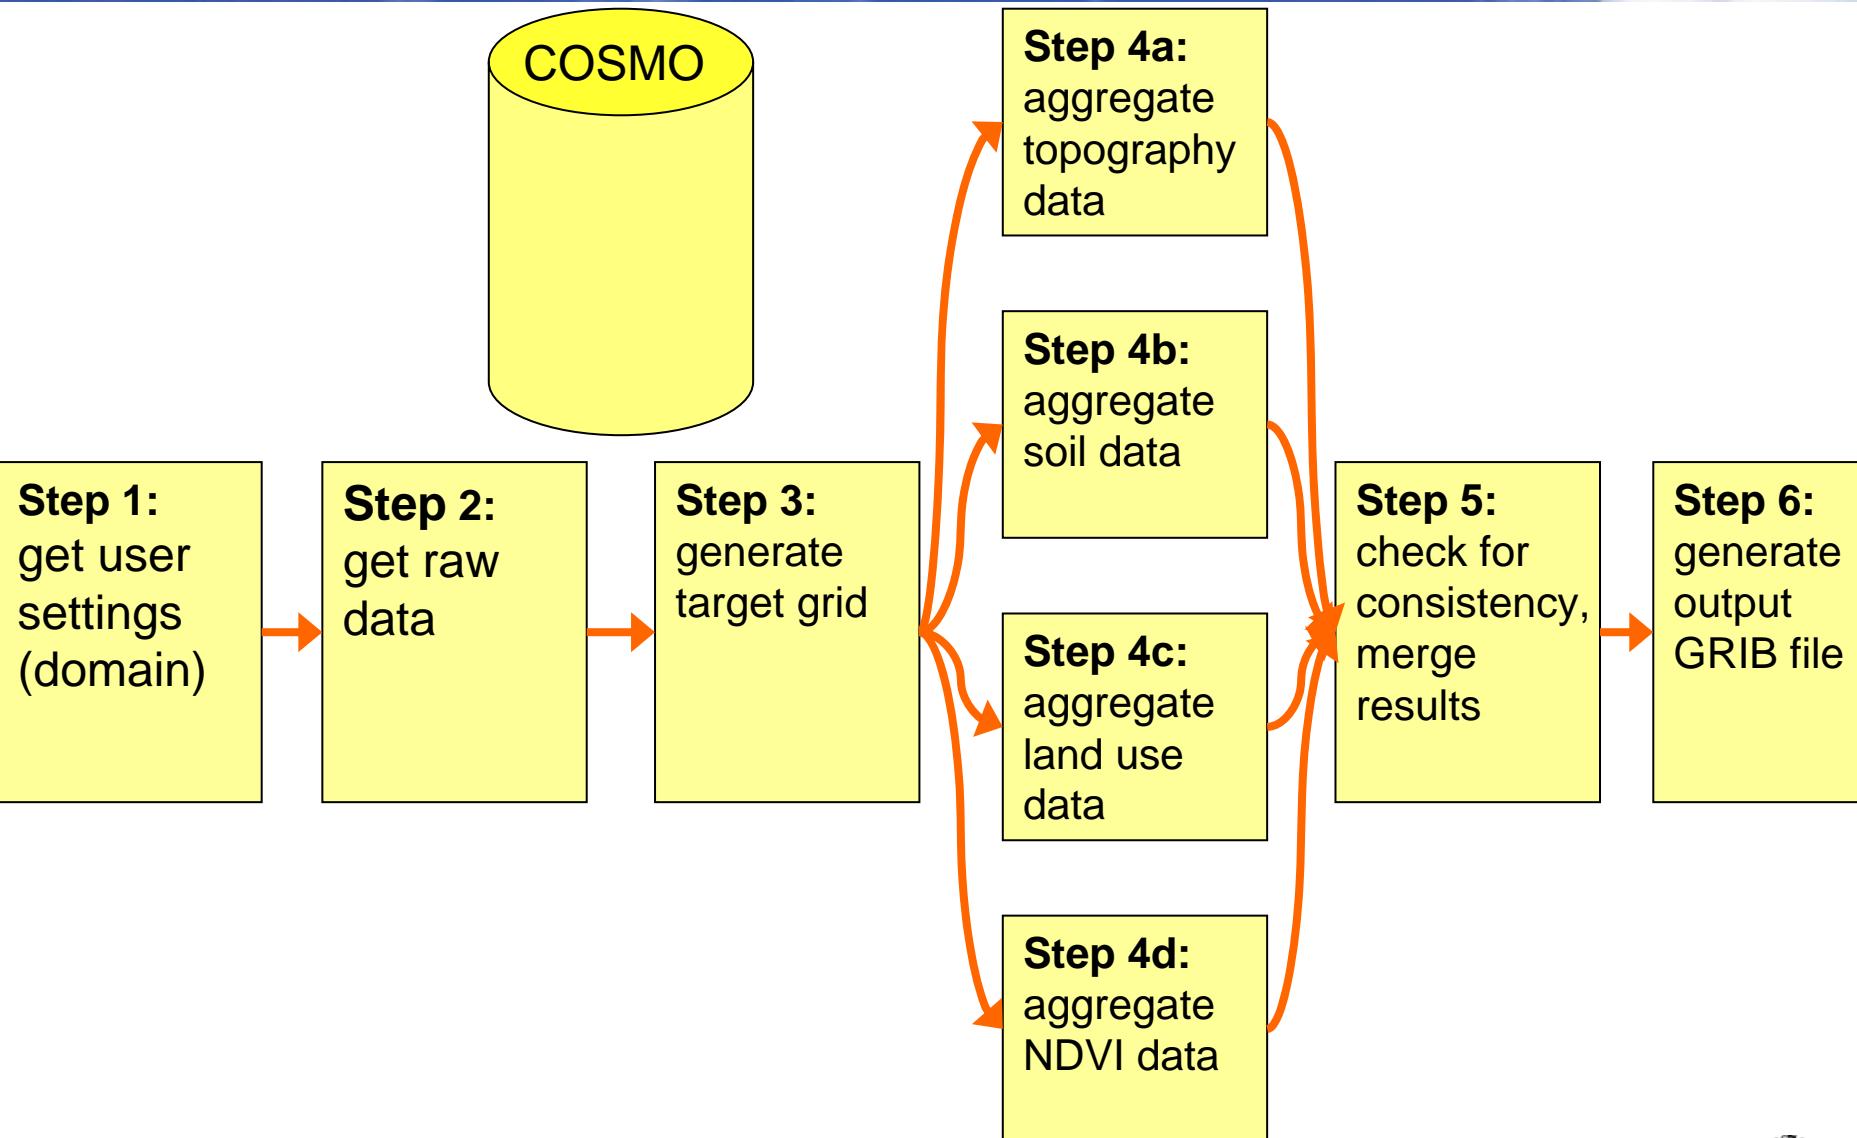

current system for generation of external parameters

- Both systems use the same raw data sets.
- The software for the generation of external parameters for COSMO has been put to the DWD Version control system.

current system for generation of external parameters

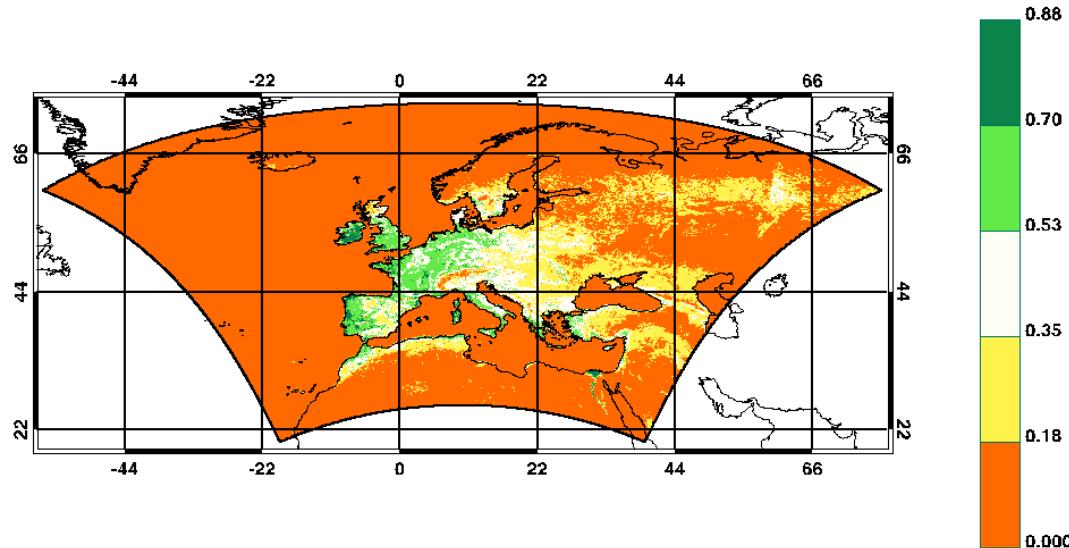

Deutscher Wetterdienst

current system for generation of external parameters

additional external parameters

Normalized Differential Vegetation Index (NDVI)

NDVI [1] 2001010100 + 000h DWD Routine
mean: 0.11 std: 0.16 min: 0.00 max: 0.88

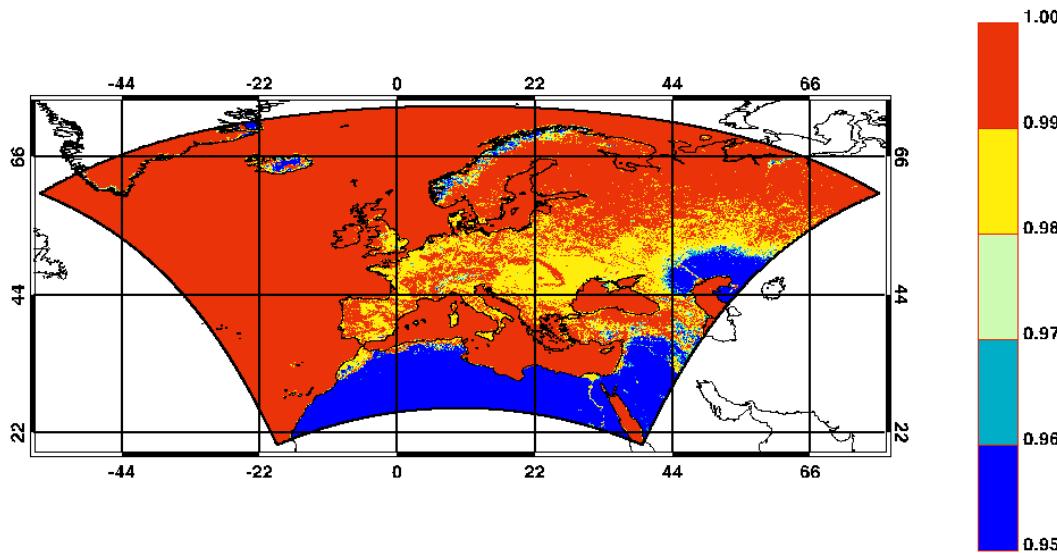

Deutscher Wetterdienst

current system for generation of external parameters

additional external parameters longwave surface emissivity

EMIS RAD [1] 2001010100 + 000h DWD Routine
mean: 0.98 std: 0.02 min: 0.95 max: 1.00

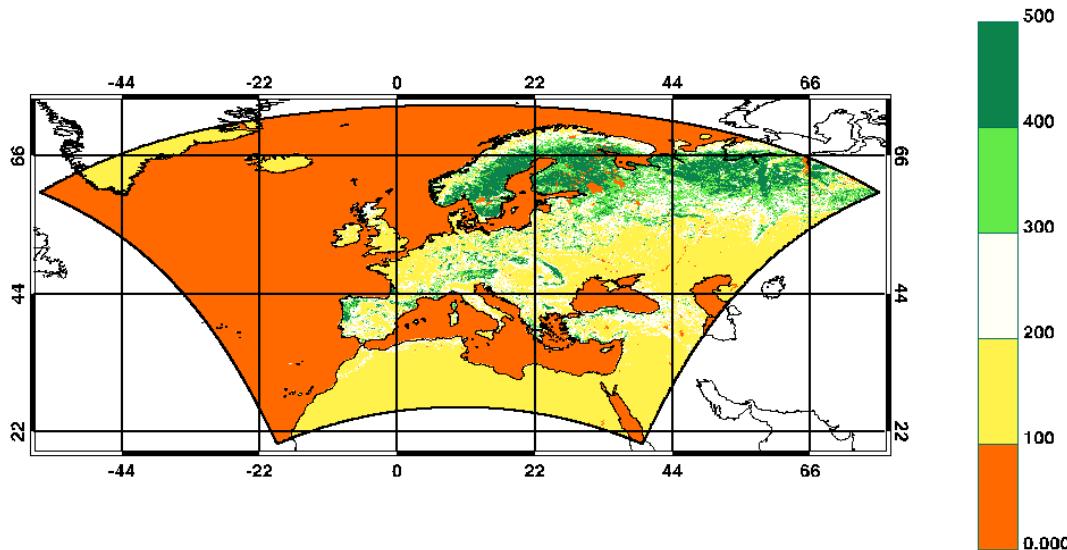

Deutscher Wetterdienst

current system for generation of external parameters

additional external parameters minimum stomata resistance of plants

PRS MIN [s/m] 2001010100 + 000h DWD Routine
mean: 112.69 std: 127.60 min: 0.00 max: 500.00

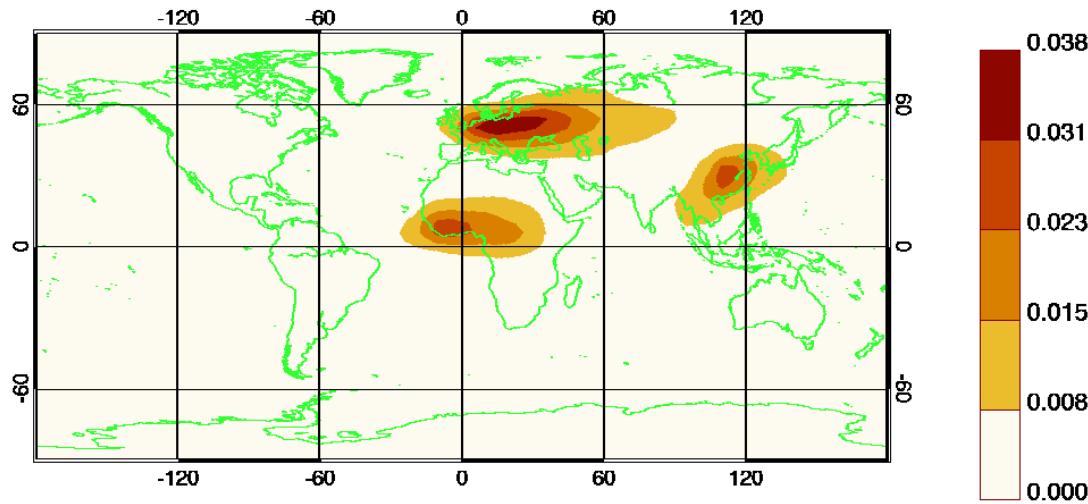

Deutscher Wetterdienst

current system for generation of external parameters

additional external parameters
optical depth at 0.55 micrometer for aerosol
(GME)

AER BC 1 1111011111 + 000h DWD Routine
mean: 0.00 std: 0.00 min: 0.00 max: 0.04

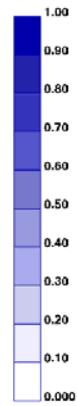

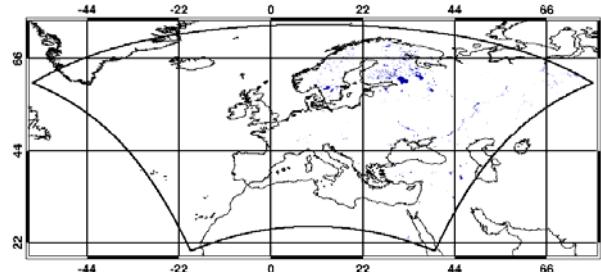

Deutscher Wetterdienst

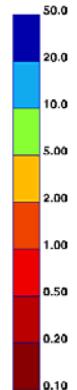

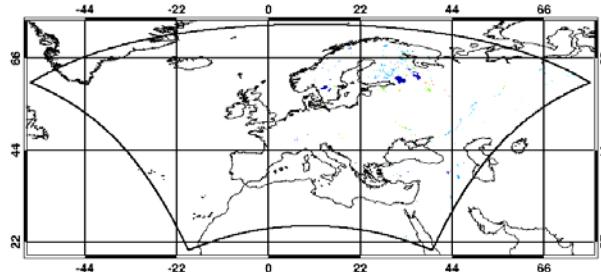

current system for generation of external parameters

additional external parameters Lake Model Flake

FR_LAKE [proportion] 2001010100 + 000h DWD Routine
mean: 0.01 std: 0.06 min: 0.00 max: 1.00

DEPTH LK [m] 2001010100 + 000h DWD Routine
mean: -0.92 std: 1.64 min: -1.00 max: 50.00

fraction of inland water

lake depth

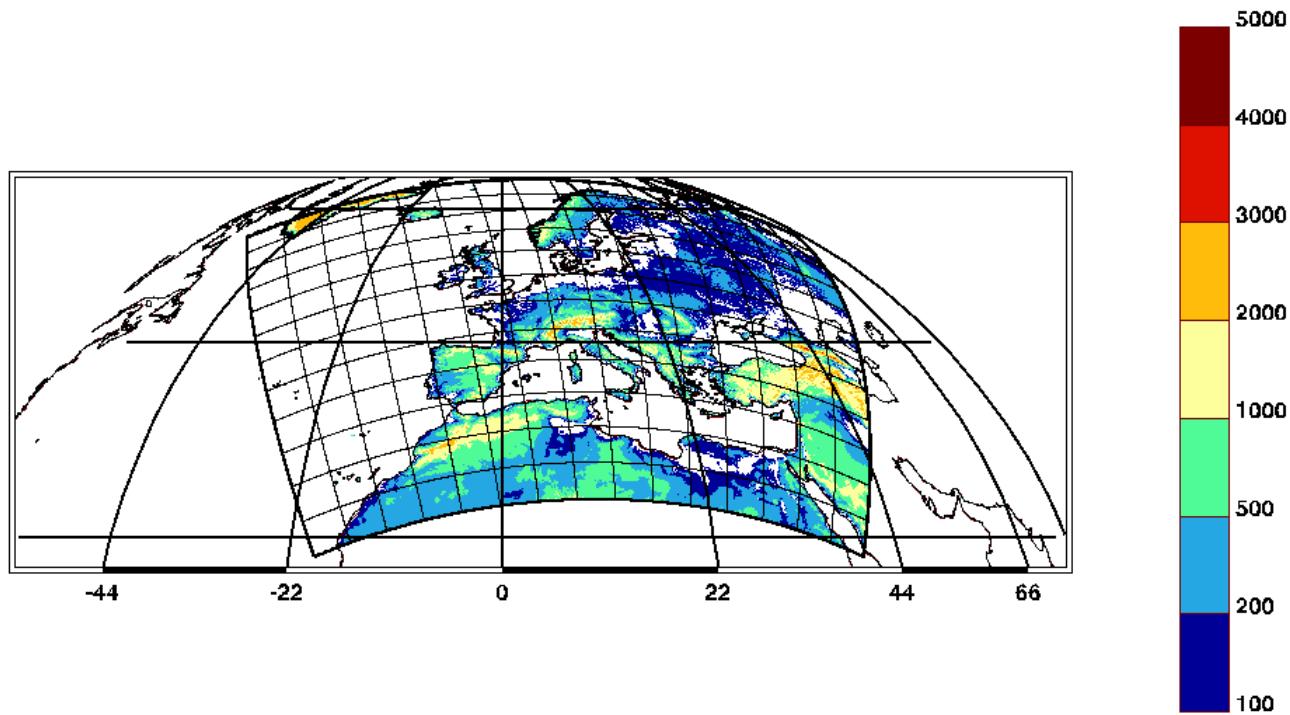

Deutscher Wetterdienst

current system for generation of external parameters

geometrical height [m]

Z [m] 2001010100 + 000h DWD Routine
mean: 221.99 std: 412.42 min: -405.00 max: 3935.88

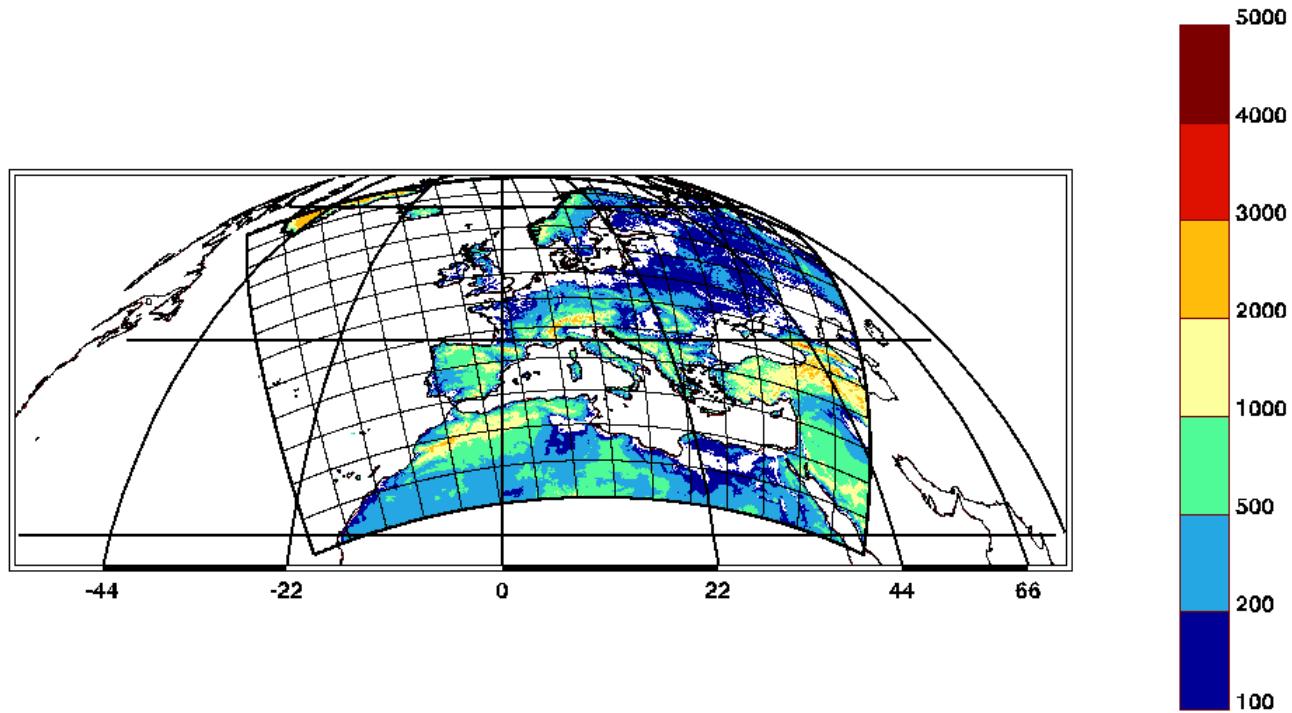

Deutscher Wetterdienst

current system for generation of external parameters

geopotential $[(m^{**2})/(s^{**2})]$

{ FIS $[(m^{**2})/(s^{**2})]$ 2001010100 + 000h DWD Routine } * 0.10
mean: 217.72 std: 404.45 min: -397.17 max: 3968.13

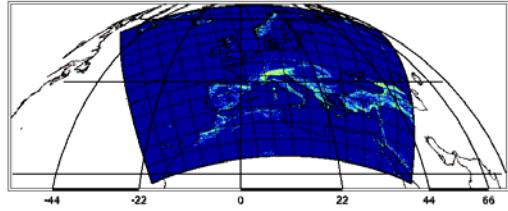

Deutscher Wetterdienst

current system for generation of external parameters

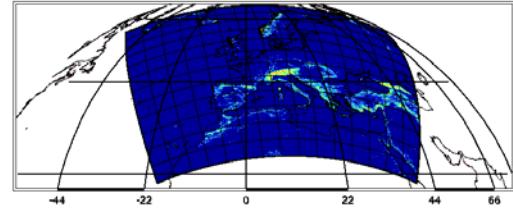

subgrid scale orography parameters

SSO STDH [m] 2001010100 + 000h DWD Routine
mean: -23.18 std: 54.80 min: 0.00 max: 823.98

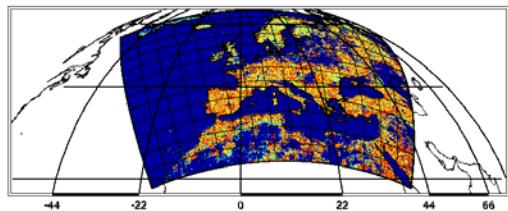

SSO SIGMA [1] 2001010100 + 000h DWD Routine
mean: -0.02 std: 0.04 min: 0.00 max: 0.56

standard deviation of subgrid scale orogr. height

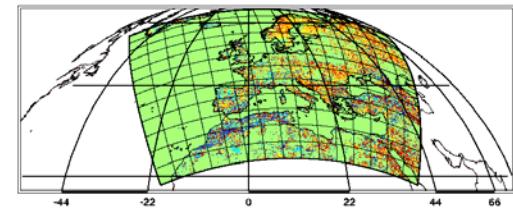

mean slope of subgrid scale orography

SSO GAMMA [1] 2001010100 + 000h DWD Routine
mean: -0.22 std: 0.31 min: 0.00 max: 1.00

SSO_GAMMA anisotropy of topography

SSO THETA [1] 2001010100 + 000h DWD Routine
mean: -0.05 std: 0.46 min: -1.57 max: 1.57

angle betw. principal axis of orogr. and global E

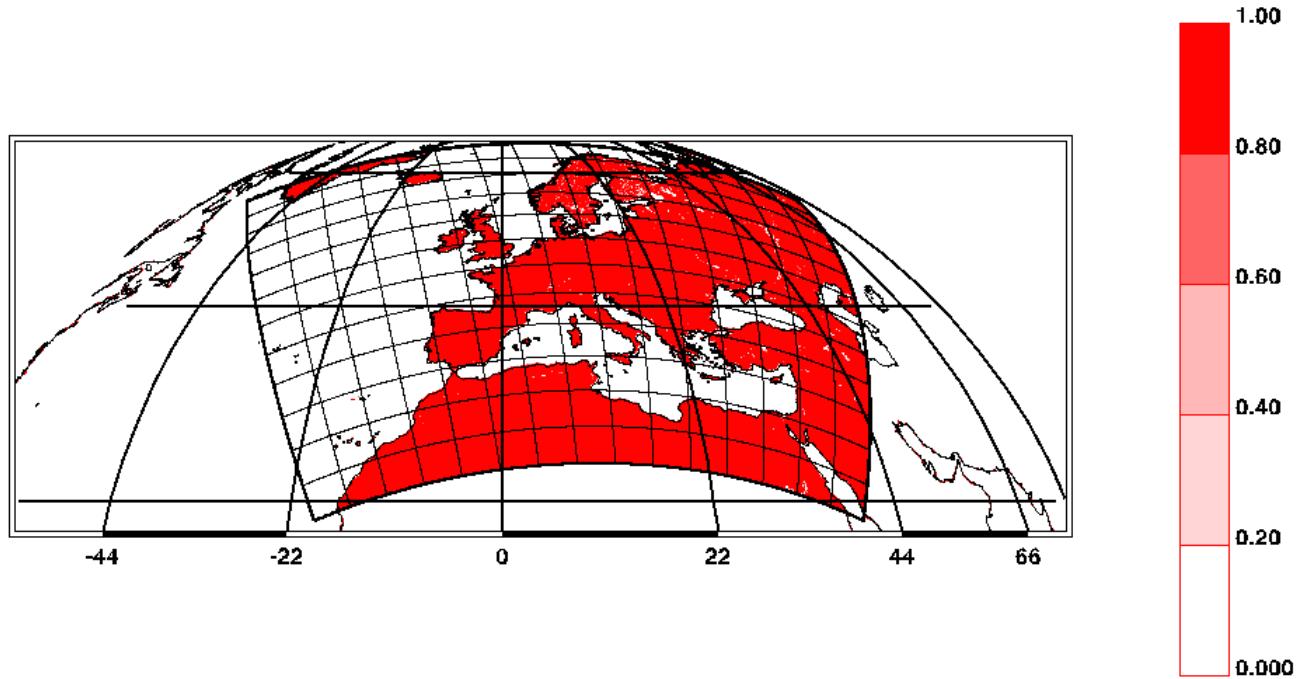

Deutscher Wetterdienst

current system for generation of external parameters

fraction land cover (land-sea mask)

FR_LAND [proportion] 2001010100 + 000h DWD Routine
mean: 0.52 std: 0.49 min: 0.00 max: 1.00

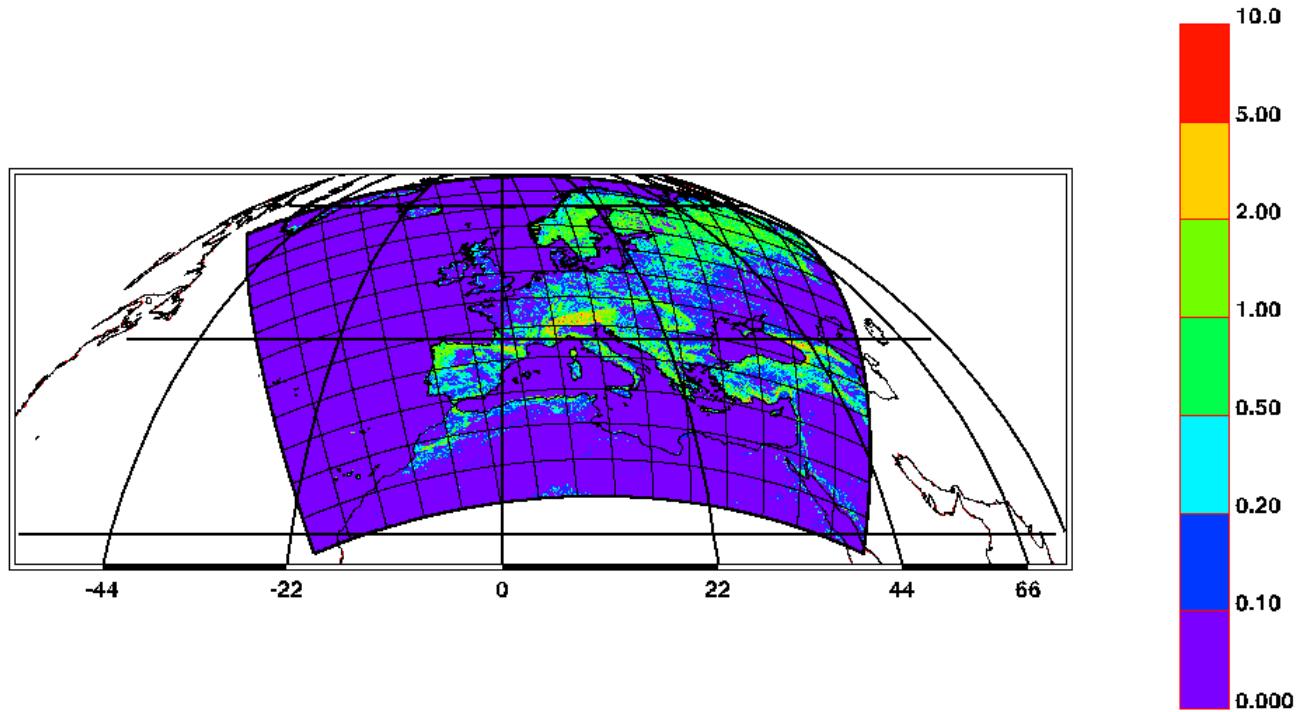

Deutscher Wetterdienst

current system for generation of external parameters

surface roughness

Z0 [m] 2001010100 + 000h DWD Routine
mean: 0.18 std: 0.38 min: 0.00 max: 9.25

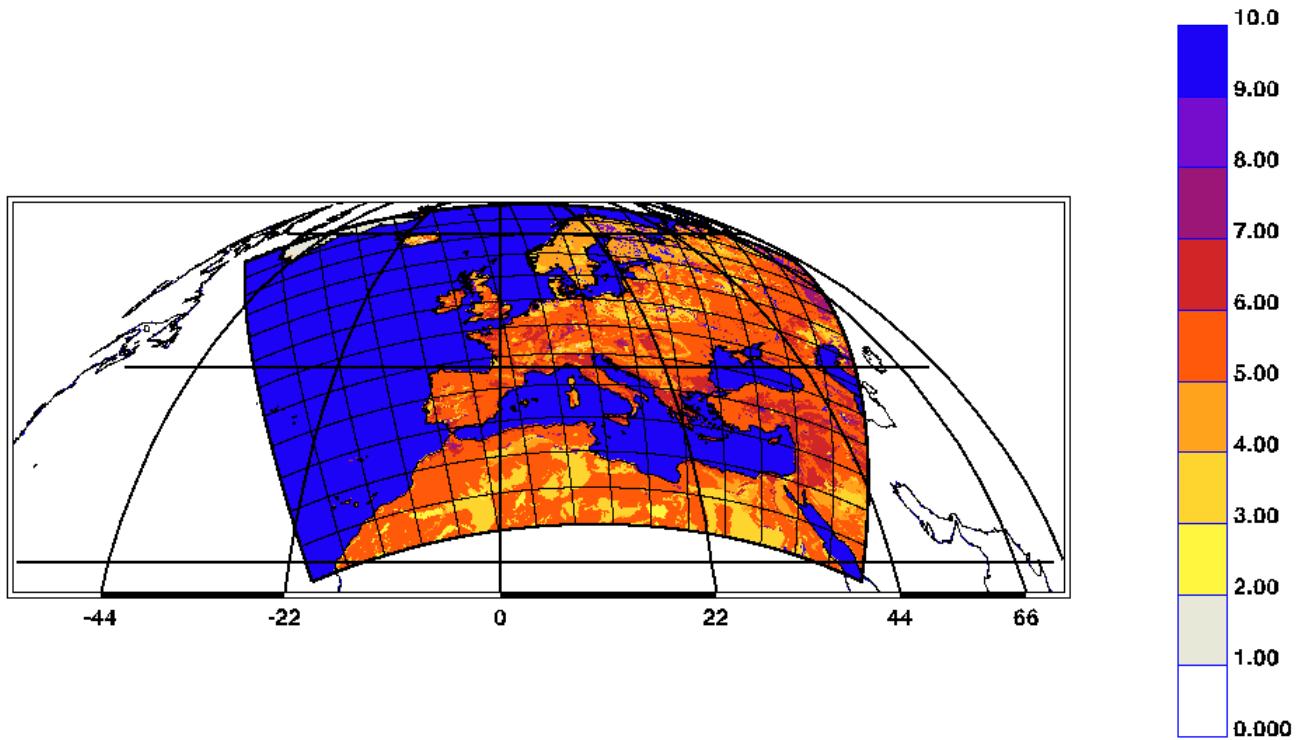

Deutscher Wetterdienst

current system for generation of external parameters

soil texture

SOILTYP [1] 2001010100 + 000h DWD Routine

mean: 6.72 std: 2.34 min: 1.00 max: 9.00

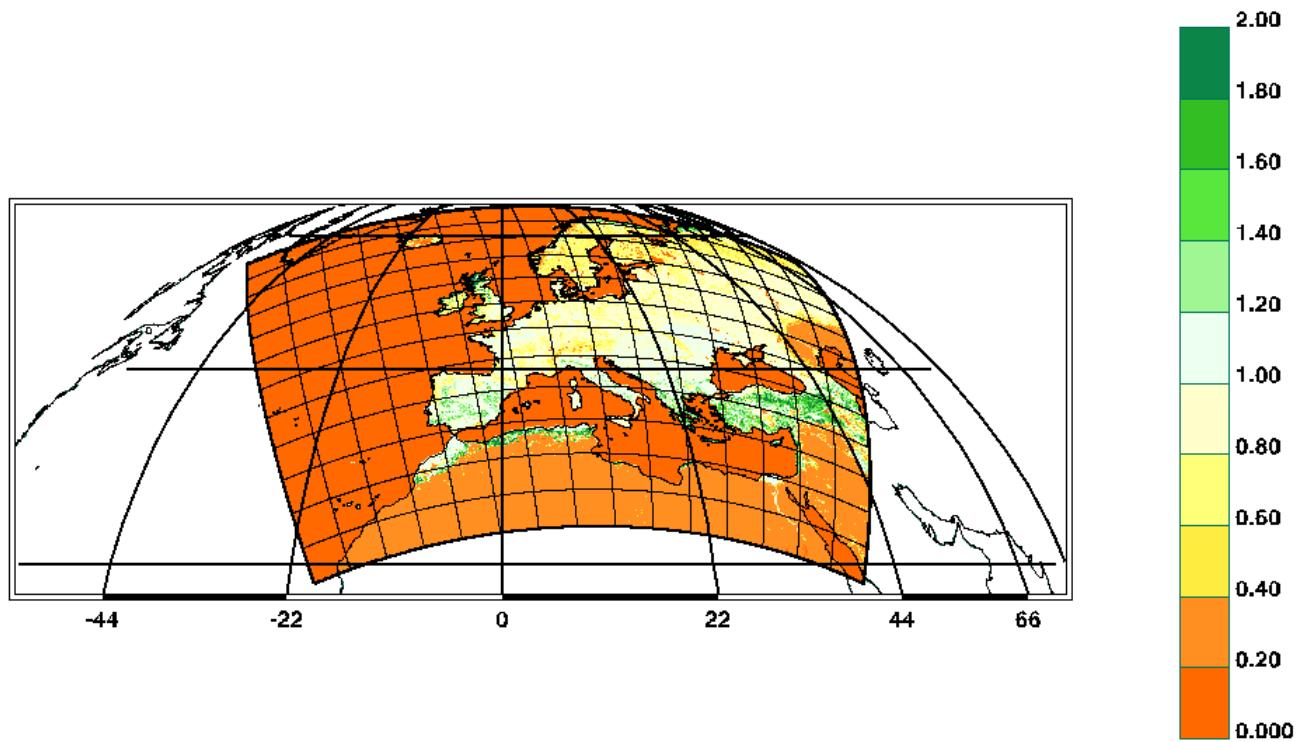

Deutscher Wetterdienst

current system for generation of external parameters

root depth

ROOT [m] 2001010100 + 000h DWD Routine
mean: 0.36 std: 0.44 min: 0.00 max: 2.00

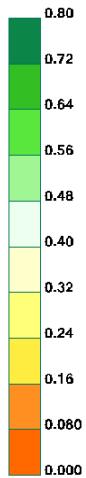

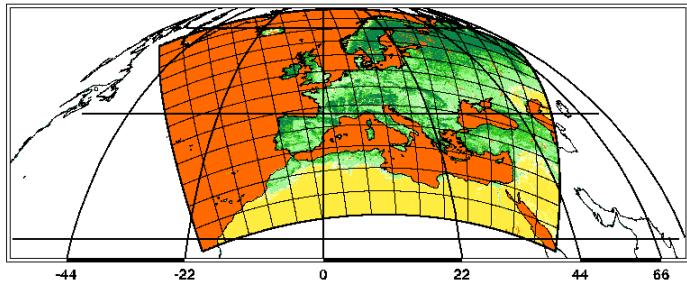

Deutscher Wetterdienst

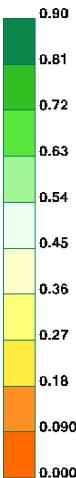

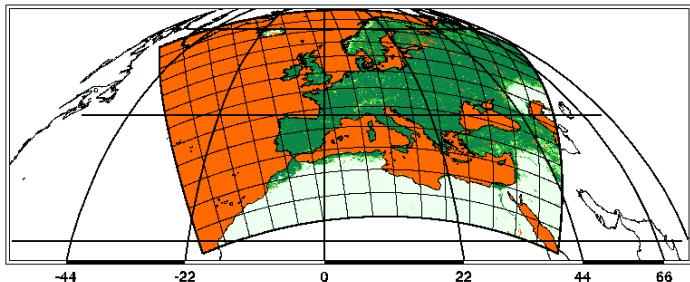

current system for generation of external parameters

plant cover

PLCOV_MN [1] 2001010100 + 000h DWD Routine
 mean: 0.26 std: 0.30 min: 0.00 max: 0.80

PLCOV_MX [1] 2001010100 + 000h DWD Routine
 mean: 0.37 std: 0.38 min: 0.00 max: 0.90

ground fraction covered by plants
 (time of rest)

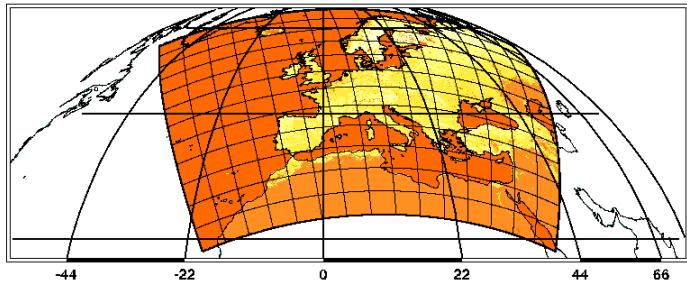

ground fraction covered by plants
 (vegetation period)

Deutscher Wetterdienst

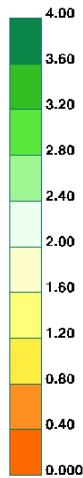

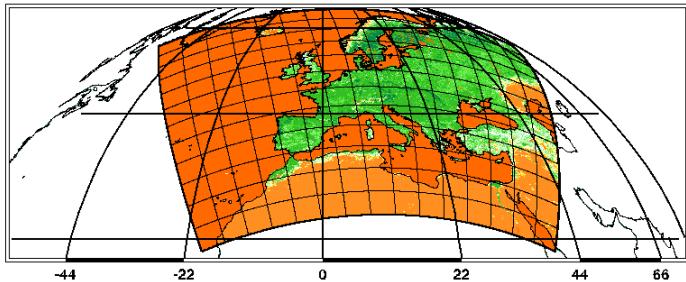

current system for generation of external parameters

leaf area index

LAI_MN [1] 2001010100 + 000h DWD Routine
 mean: 0.38 std: 0.43 min: 0.00 max: 3.00

LAI_MX [1] 2001010100 + 000h DWD Routine
 mean: 1.14 std: 1.42 min: 0.00 max: 4.00

leaf area index (time of rest)

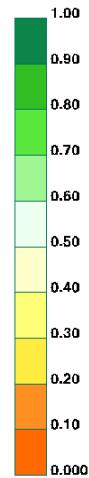

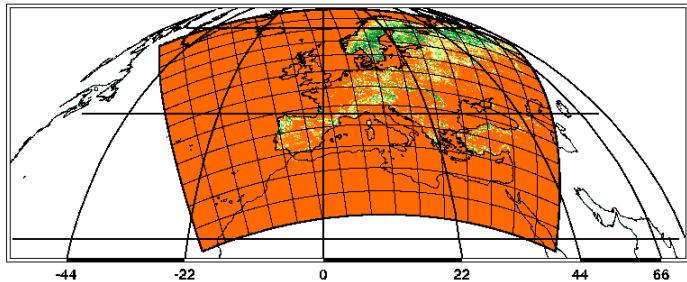

leaf area index (vegetation period)

Deutscher Wetterdienst

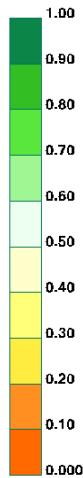

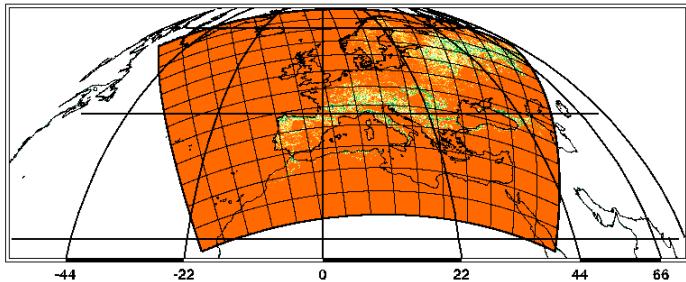

current system for generation of external parameters

type of forest

FOREST_E [1] 2001010100 + 000h DWD Routine
 mean: 0.07 std: 0.20 min: 0.00 max: 1.00

FOREST_D [1] 2001010100 + 000h DWD Routine
 mean: 0.05 std: 0.15 min: 0.00 max: 1.00

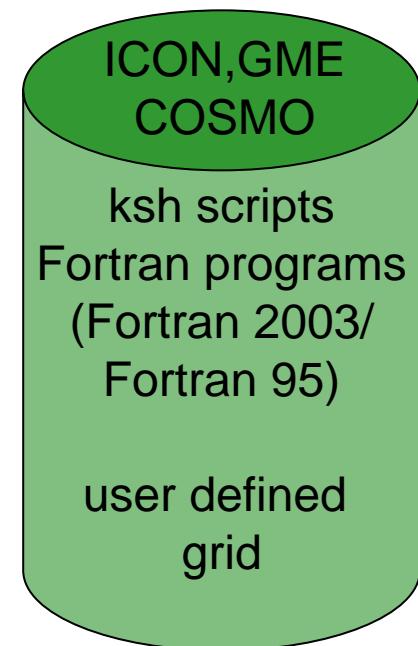

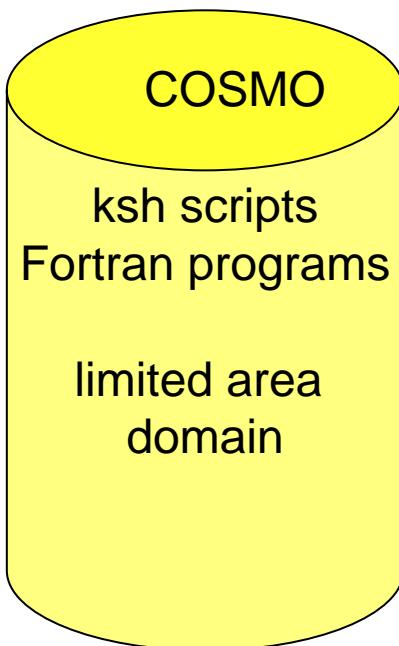

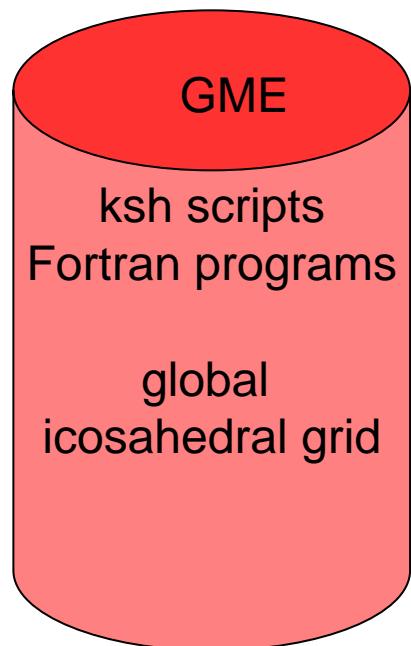

ground fraction covered by evergreen
forest

ground fraction covered by deciduous
forest

Deutscher Wetterdienst

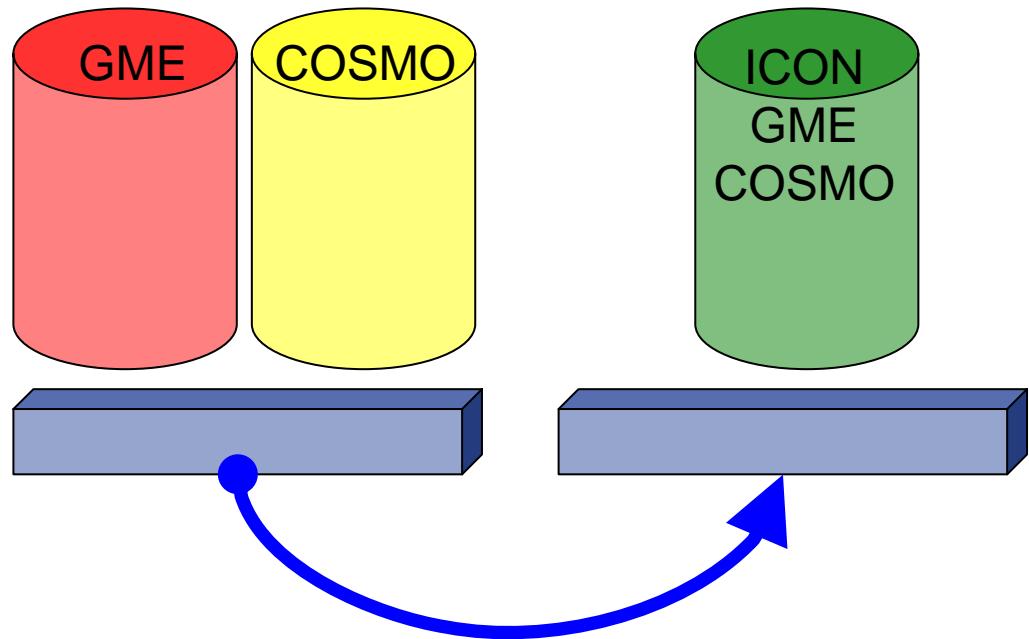

planned extensions

next steps in software development

general changes

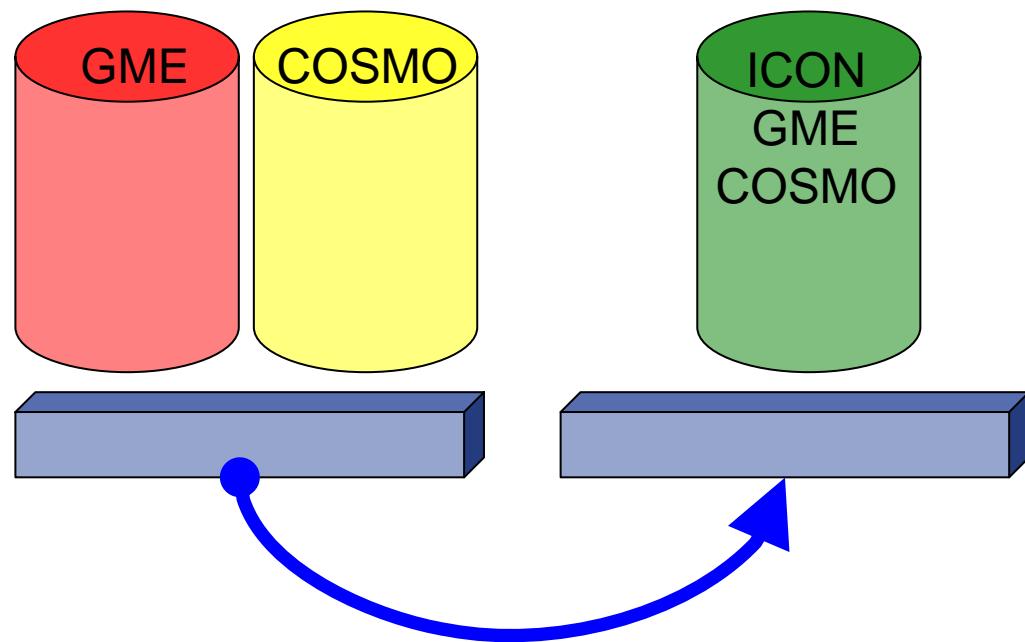

- write software requirements specification
 - software design
 - additional external parameters
 - user interface
- put the software for the generation of external parameters for GME into the DWD Version control system

next steps in software development

general changes (long term)

- recode software according to the software requirements specification
- write documentation

Thank you for your attention!

Deutscher Wetterdienst
