# COSMO-LEPS

**No scientific updates to the COSMO-LEPS suite in 2018-2019**

## **Maintenance**

- Work flow migration from XCDP to ECFLOW (November 2018)
- Transition to new MARS dissemination (January 2019)
- INT2LM version updated to 2.05 (February 2019)
- Transition to new version ENS ECMWF (June 2019)
- Runtime issues
- User requests

- Upgrade of several modules (Magics, Metview, python, grib\_api, libsim, fieldextra) due to ECWMF system session (18 September 2019)
- Complete migration from grib\_api to eccodes (libsim, fieldextra) (within 2019)
- Work flow migration from XCDP to ECFLOW of esuite (within 2019)
- Upgrade of COSMO version from 5.03 SP to 5.06 SP (as soon as it will be available)

## Upgrade

- Extension of COSMO-LEPS domain towards East to include Israel (increment of ~45% cost and time, challenging implementation)
- Lagged ensemble (ENS 06UTC, 12UTC for LEPS starting at 12UTC; ENS 18UTC, 00UTC for LEPS starting at 00UTC) (= SBU, simple implementation)
- SPPT (in COSMOv5.06 SP) (small increment of cost and time, simple implementation)
