

STATUS OF KENDA-LETKF DA CYCLE AT CNMCA

Valerio Cardinali

26° Cosmo GM, 02-05 September 2024, Offenbach

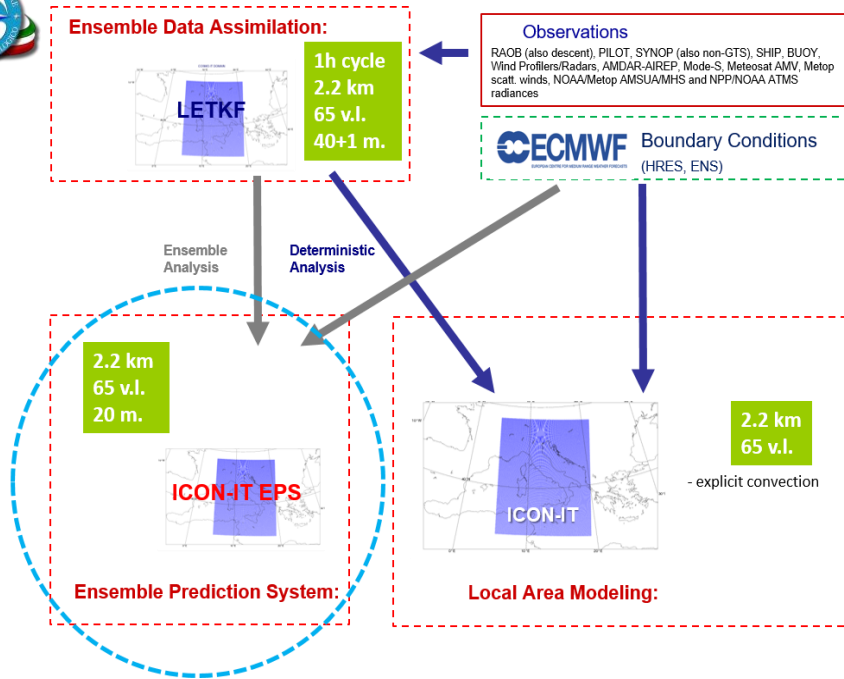

OUTLINE

- Current national operational setup
- Assimilation of RADAR reflectivity in ICON: setup and results
- Assimilation of RADAR radial winds: setup and first results
- Assimilation of non conventional synoptic obs (MeteoMont, MeteoNetwork, Autostrade, DPC)
- Assimilation of GNSS (ZTD only) obs: first setup
- Future developments

Operational ICON-IT @ CNMCA - ITALY

- ❑ The ICON model (1h DA cycle + 00/12 UTC model runs) is fully operational at the Italian Met Service since **jul 2020** on ECMWF-HPC and available to forecasters for daily use
- ❑ ICON-IT EPS: the implementation process is ongoing (on ECMWF-HPC or on local hpc);
- ❑ ICON-MED tests on ECMWF-HPC (2.8 or 5 km resolution).
- ❑ KENDA-LETKF provides analyses at a 1-hourly interval

RADAR exp2: REFL stats (ALL radars)

29 April – 5 May

RADAR exp2: RADW stats (ALL radars)

29 April – 5 May

Conclusions – RADAR obs assimilation

- ❑ EXP 1: only REFL assimilation.
 - Small improvements in terms of TCC, RH2m, precipitation;
 - Obs increments: reduction of stdv for each vertical levels, small increase of bias in some vertical levels;
 - **OPERATIONAL** since 20/08/2024.

- ❑ EXP 2: REFL + RADW assimilation.
 - Obs increments for REFL: behaviour similar to EXP 1;
 - Obs increments for RADW: small reduction of stdv for each vertical levels, small increase of bias in the lowest vert. levels;
 - Number of RADW obs assimilated: around 20% with respect to the number of REFL obs assimilated;
 - Need of further statistical investigation for RADW observations.

Assimilation of Non conventional Synoptic observations

- **MeteoNetwork:** crowd sourced synoptic stations, station number: 667
- **MeteoMont:** Army Alpine Observation department, station number: 46
- **Autostrade:** station number: 207
- **DPC:** Civil Protection Department, station number: 5375

Variables: T, u,v, sp, rh

Period of study: Dec 2023 – June 2024

	mean(obs-fg)	stdv(obs-fg)	num_obs
T mean	0.011554	stdv 1.323750	1856712
P mean	0.087984	stdv 0.824691	1812925
