

AG TERRA 2019-02-04

Agenda and Minutes:

- Presentation Daniel Regenass (ETH): [Validation and calibration of a new runoff parameterization for TERRA ML](#)
 - Discussion:
 - **Usage of external parameters for orography**
 - **Horizontal fluxes are not considered for the moment**
 - **Benefit from revised soil types**
-

- Presentation Jürgen Helmert (DWD): [Implementation of a Mire parameterization in TERRA](#)
 - Discussion:
 - **Need to distinguish between wet and dry peats - external parameters**
 - **Need information about water table**
 - **Revision of peat physical parameters suitable for NWP**
-

- Other
- **Next meeting intended for March about EXTPAR soil data and revised soil water transport in TERRA**
